Cities, Networks, and Global Environmental Governance: Spaces of Innovation, Places of Leadership. New York: Routledge. 240 pages. ISBN 9780415537513, \$130.00 hardcover. by Bouteligier, Sofie, 2013 .

Cities, Networks, and Global Environmental Governance

Hierarchical analysis of 256 cities in 118 countries suggests that the degree of cities' globalization, or their level of "global cityness," is positively associated with the cities' membership in the global networks. The level of individual cities' integration into the international economy and transportation grid is crucial for sharing ideas of global environmental responsibility.

Global Cities and Transnational Climate Change Networks

Hierarchical analysis of 256 cities in 118 countries suggests that the degree of cities' globalization, or their level of "global cityness," is positively associated with the cities' membership in the global networks. The level of individual cities' integration into the international economy and transportation grid is crucial for sharing ideas of global environmental responsibility.

Global Cities and Transnational Climate Change Networks

This book provides a critical analysis of the role of cities in addressing climate change and the prospects for urban sustainability. In the post-Rio era, international organizations and transnational networks have promoted the need for local action on global environmental issues.

Cities and Climate Change: Urban Sustainability and Global

Through their local relationships and their participation in regional networks, Healthy Cities are able to connect local concerns with broader regional and global issues. Both Healthy Cities programs in this study participate in regional Healthy Cities networks. The 'Healthy Cities Programme in Europe has evolved over 5-year phases, each giving special attention to a number of priority themes' .

World City Network: A global urban analysis - 2nd Edition

The past decade has witnessed a growing interest among scholars of international relations, and global environmental governance in particular, in the role of transnational networks within the international arena (Risse-Kappen, 1995; Lipschutz, 1996; Wapner, 1996; Keck and Sikkink, 1998; Risse, Ropp, and Sikkink, 1999; Newell, 2000).While the existence and potential significance of such . . .

Transnational Networks and Global Environmental Governance

The Global Environments Network (GEN) supports, nurtures and connects inspiring changemakers who are innovating solutions to apparently intractable environmental and social problems. Working from local to global scales, they are drawing on superb academic backgrounds and inspiring field experiences to develop practical actions – typically out of the public eye – that improve local livelihoods, resolve conflicts and restore environments.

Urban areas have a high environmental impact that can be felt globally, as well as within its own borders. The environmental impacts of modern cities go beyond their surrounding regions. Size,...

Environmental Problems of Modern Cities

For 3 decades the Healthy Cities movement has been a pioneering driver of change, creating healthier urban settings that support the health and well-being of the people that use them. It has also inspired Healthy Cities networks to blossom in all other WHO regions creating a global push for healthy cities. The network will celebrate the past 30 years with an eye on the future, recognizing that cities are playing a critical role socially, culturally and politically.
