Medicare Claims Processing Manual

CMS has revised the Medicare Claims Processing Manual (Pub. 100-04, Chapter 12, Section 30.6.15.2)
to indicate that beginning in CY 2017, CPT codes 99358 and 99359 (prolonged services without face-to-
face contact) are separately payable under the Medicare Physician Fee Schedule, reflecting policies
finalized in the CY 2017 Medicare Physician Fee Schedule Final Rule.

The 2001 CPT Professional comes with all 2001 code information. This code book also includes colour keys, anatomical illustrations, medical terminology, thumb tabs and a convenient spiral binding.

This guide to successful practices in observation medicine covers both clinical and administrative aspects for a multinational audience.

This is the most comprehensive CPT coding resource published by the American Medical Association. This new Professional Edition provides all the features of the Standard Edition plus many extras. it contains: 100 anatomical and procedural illustrations; an overview of modifiers and abbreviations; Color-coded keys for easy identification of section headings; New procedural drawings for visual confirmation of procedures being coded.

For more than a generation haemodialysis has been the principal method of treating patients with both acute and chronic renal failure. Initially, developments and improvements in the system were highly technical and relevant to only a relatively small number of specialists in nephrology. More recently, as advances in therapy have demonstrated the value of haemofiltration in the intensive therapy unit and haemoperfusion for certain types of poisoning, the basic principles of haemodialysis have been perceived as important in many areas of clinical practice. In this volume, the potential advantages of bicarbonate haemodialysis are objectively assessed, the technical and clinical aspects of both haemofiltration and haemoperfusion discussed and the continuing problems associated with such extracorporeal circuits analysed. All the chapters have been written by recognized experts in their field. The increasing availability of highly technical facilities for appropriately selected patients should ensure that the information contained in the book is relevant not only to nephrologists but to all practising clinicians. ABOUT THE EDITOR Dr Graeme R. D. Catto is Professor in Medicine and Therapeutics at the University of Aberdeen and Honorary Consultant Physician/Nephrologist to the Grampian Health Board. His current interest in transplant immunology was stimulated as a Harkness Fellow at Harvard Medical School and the Peter Bent Brighton Hospital, Boston, USA. He is a member of many medical societies including the Association of Physicians of Great Britain and Ireland, the Renal Association and the Transplantation Society.

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

In this groundbreaking guide, a management expert outlines the transformative leadership skill of tomorrow—one that can make it possible to build truly diverse and inclusive teams which value employees' need to belong while being themselves. Humans have two basic desires: to stand out and to fit in. Companies respond by creating groups that tend to the extreme—where everyone fits in and no one stands out, or where everyone stands out and no one fits in. How do we find that happy medium where workers can demonstrate their individuality while also feeling they belong? The answer, according to Stefanie Johnson, is to Inclusify. In this essential handbook, she explains what it means to Inclusify and how it can be used to strengthen any business. Inclusifying—unlike “diversifying” or “including”—implies a continuous, sustained effort towards helping diverse teams feel engaged, empowered, accepted, and valued. It’s no use having diversity if everyone feels like an outsider, she contends. In her research, Johnson found common problems leaders exhibit which frustrate their attempts to create diverse and cohesive teams. Leaders that underestimated the importance of group coherence and dynamics often have employees who do not feel like they belong; leaders that ignore the benefits of listening to different perspectives leave some people feeling like they cannot be their authentic selves. By contrast, leaders who Inclusify can forge strong relationships with their teams, inspire greater productivity from all of their workers, and create a more positive environment for everyone. Having a true range of different voices is good for the bottom line—it allows for the development of the best, most innovative, and creative solutions that are essential to success. Inclusify reveals the unexpected ways that well-intentioned leaders undermine their teams, explains how to recognize the myths and misperceptions that drive these behaviors, and provides practical strategies to become an Inclusifyer. By learning why uniqueness and belonging are so imperative, leaders can better understand what makes their employees tick and find ways to encourage them to be themselves while ensuring they feel like they are fully part of the group. The result is a fully engaged team filled with diverse perspectives—the key to creating innovative and imaginative ideas that drive value.
