INDEPENDENT EVALUATION OFFICE — UNDP

• UNDP is present in 178 countries and has an in-depth contextual knowledge and a strong network of experts contributing to an enabling business environment. The SDGs provide a plan of action for people, planet and prosperity and aim to transform our world by 2030 – adopted by UN General Assembly. 3

Understanding the Sustainable Development Goals (SDGs)

BACKGROUND. For more than two decades UNDP has promoted the concept of human development as an alternative development approach to the neoliberal models. Using Sen's capability approach, human development is conceived as a process of widening people's choices.1The people-centered approach of human development has been quite influential in providing an alternative discourse on development.

CONCEPT NOTE — United Nations

UNDP, following a review of its experience in other countries and proposed improvements, disburses funds to recipients. While there is no funding ceiling, grants are expected to range up to \$250,000. Given that grants are for start-up or gap filling, they should be used within 26 weeks of disbursement.

A country's abundant natural resources may serve as a curse or a blessing, with the outcome often dependent on prevailing governance structures and experience managing these assets. Despite natural resource advantages, many African countries have failed to transform their enormous economic potential and wealth into tangible benefits such as sustainable socio-economic development, human security, or peace. Governance, Conflict, and Natural Resources in Africa reevaluates the role that foreign state-owned and private-sector actors play in resource-rich states – whether stable, post-conflict, or fragile – in sub-Saharan Africa. Through research and an analysis of in-depth interviews with local stakeholders in Ghana, Sierra Leone, and Ethiopia, Hany Besada explains how foreign state-owned and private-sector corporations have contributed to economic growth at both the national and local levels in different resource-rich countries. This book reveals the unique challenges and opportunities created by these investors, demonstrating that new policies in business practices and operations have the potential to generate sustainable development and positive economic transformation. Governance, Conflict, and Natural Resources in Africa puts forward a novel framework for understanding the role of private economic actors in extractive industries in Africa and sheds new light on foreign private-sector contributions to capacity building and economic development.

This evaluation of UNDP's contribution to disability inclusive development is part of the work programme for the Independent Evaluation Office approved by the Executive Board in 2014/2015 (DP 2014/5). It provides an assessment of UNDP contribution to disability inclusive development during the period 2008-2016, corresponding to the current and past UNDP strategic plans, and to the period within which the UN Convention on the Rights of Persons with Disabilities (CRPD) has been in force.

This 'Handbook on Planning, Monitoring and Evaluating for Development Results' is an updated edition of the 2002 edition of 'Handbook on Monitoring and Evaluation for Results'. It seeks to address new directions in planning, monitoring and evaluation in the context of the United Nations Development Programme (UNDP) corporate strategic plan, the requirements of the UNDP evaluation policy approved by the Executive Board in 2006 and the United Nations Evaluation Group (UNEG) 'Standards for Evaluation in the UN System'. The updated Handbook also incorporates information recommended by key users of the Handbook during various workshops held by UNDP units.

The Independent Evaluation Office (IEO) of the United Nations Development Programme (UNDP) carried out an evaluation of UNDP contribution to anti-corruption and governance integrity in a development context in 2015. The evaluation assesses UNDPs contribution to strengthening national capacities in anti-corruption and governance integrity. This includes an assessment of UNDPs contribution to global and regional level debates and advocacy. Given the thrust to anti-corruption and governance in the Sustainable Development Goals, the evaluation will contribute to UNDPs anti-corruption and governance integrity programme strategy.

Aid for Trade (ATF) has become a major item on the international trade and development discourse. This is to a large extent in response to concerns expressed by developing countries and economies in transition with regard to their capacities to implement trade agreements, especially WTO agreements, and undertake necessary adjustments to increase net development gains from emerging trade opportunities. In this World Report, major UN agencies active in development cooperation and longstanding providers of trade-related technical assistance and capacity building discuss ways to sustain the momentum towards the operationalization and implementation of the ATF initiative and the supportive role to be played by the UN system. This is consistent with UN's role in promoting development and helping to achieve poverty reduction, as committed in the Millennium Declaration and the 2005 World Summit Outcome. The Report should be of particular interest to government officials, officials of regional organizations, representatives of the private sector dealing with trade agreements and negotiations, civil society and academia. Supachai Panitchpakdi, Secretary-General of UNCTAD Lakshmi Puri is Acting Deputy Secretary-General and Director of the Division on International Trade and Services, and Commodities at UNCTAD in Geneva. Philippe De Lombaerde is Associate Director of United Nations University (UNU-CRIS) in Bruges. In collaboration with: UNCTAD, ECA, ECLAC, ESCAP, ESCWA, UNECE, UNIDO, UNDP, UNEP

Bringing together the work of literary critics, social scientists, activists, and creative writers, this edited collection explores the complex relationships between environmental change, political struggle, and cultural production in the Caribbean. It ranges across the archipelago, with essays covering such topics as the literary representation of tropical storms and hurricanes, the cultural fallout from the Haitian earthquake of 2010, struggles over the rainforest in Guyana, and the role of colonial travel narratives in the reorganization of landscapes. The collection marks an important contribution to the fields of Caribbean studies, postcolonial studies, and ecocriticism. Through its deployment of the concept of 'world-ecology', it offers up a new angle of vision on the interconnections between aesthetics, ecology, and politics. The volume seeks to grasp these categories not as discrete (if overlapping) entities, but rather as differentiated moments within a single historical process. The 'social' changes through which the Caribbean has developed have always involved changes in the relationship between humans and the rest of nature; and these changes have long been entangled with the emergence of new kinds of cultural production. The contributors to this collection provide a series of unique insights into the relationship between aesthetic practice and specific ecological processes and pressure-points in the region. More than ever Caribbean writers and artists are engaging explicitly with environmental concerns in their work; this volume responds to that trend by bringing literary and cultural criticism into sustained dialogue with debates around local, national, and regional ecological issues.

Despite increasing reports across the globe on renewable development and maintenance, little is known regarding what strategies are required for improved economic growth and prosperity in Africa. Improving an understanding of the methods for promoting growth through reusable resource development and administration is a vital topic of research to consider in assisting the continent's development. The Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa provides emerging research on the strategies required to promote growth in Africa as well as the implications and issues of the expansion of prosperity. While highlighting sustainable education, pastoral development pathways, and the public-sector role, readers will learn about the history of sustainable development and governmental approaches to improving Africa's economy. This publication is a vital resource for policy makers, research institutions, academics, researchers, and advanced-level students seeking current research on the theories and applications of development in societal and legal institutions.

Human rights activists Roger Normand and Sarah Zaidi provide a broad political history of the emergence and development of the human rights movement in the 20th century through the crucible of the United Nations, focusing on the hopes and expectations, concrete power struggles, national rivalries, and bureaucratic politics that molded the international system of human rights law. The book emphasizes the period before and after the creation of the UN, when human rights ideas and proposals were shaped and transformed by the hard-edged realities of power politics and bureaucratic imperatives. It also analyzes the expansion of the human rights framework in response to demands for equitable development after decolonization and organized efforts by women, minorities, and other disadvantaged groups to secure international recognition of their rights.

The global number of internally displaced persons (IDPs) has reached an all-time high, as an increasing number of IDPs remain displaced for years or even decades. Tens of millions of IDPs are dependent on humanitarian assistance or live far below the poverty line in substandard housing without security of tenure, and with no or only limited access to basic services, education and health care. With durable solutions out of reach and facing barriers to leading self-sufficient lives, they are "left behind" despite the promises of the Sustainable Development Goals. In light of these alarming trends and the need for more effective response strategies, this OCHA-commissioned study offers a better understanding of protracted internal displacement and related challenges. The study finds that addressing protracted internal displacement is not a purely humanitarian concern, but rather a key development and political challenge, with humanitarian and, depending on the context, human rights, peace and security, and disaster risk reduction actors at all levels each having a distinct role to play. The study recommends that stakeholders focus on clear and measurable collective outcomes and the reduction of vulnerabilities of IDPs and host communities over time. This approach implicitly recognizes that IDPs should not have to wait until a conflict is fully resolved or all impacts of a disaster have ceased before they can begin rebuilding their lives and move towards self-sufficiency. Through this new approach, millions of IDPs and host communities could secure better access to livelihood opportunities, adequate housing with security of tenure and basic services. The study features five case studies: Colombia, the Democratic Republic of the Congo (DRC), the Philippines, Somalia and Ukraine.

"The Emergence of China: Opportunities and Challenges for Latin America and the Caribbean provides a comprehensive overview of China's economic policy and performance over recent decades and contrasts them with the Latin American experience. What are the underlying factors behind China's competitive edge? What are the strategic implications of China's rise for growth and development in Latin America? These questions open new avenues for thinking about revitalizing development strategies in Latin America in the face of China's successful development and reduction of poverty. This insightful report is a must-read for analysts, policymakers, and development practitioners, not only in Latin America and the Caribbean, but wherever China's presence is being felt."--Jacket.
