- It can be used practically in heat transfer for a relatively short time and/or in a relatively thick

Online Library

Conduction

Heat Transfer • The governing equation with no bulk flow and no heat generation is • The boundary conditions are • The initial condition is $T(x, 0) = T_i$

Conduction Heat

Online Library

Conduction

Heat transfer:

Unsteady state

Heat transfer
occurs at a

lower rate in
materials of low
thermal

conductivity
than in

materials of
high thermal
conductivity.

For instance,
metals typically

Online Library Conduction

have high thermal conductivity and are very efficient at conducting heat, while the opposite is true for insulating materials like Styrofoam .
