This guide has been written to provide conceptual and procedural guidance for the application of quality management systems in the field of concrete construction. Modern construction requires more and more specialized expert knowledge and involves an increasing number of participants in the construction process, such as architects, designers, material producers and contractors. The quality of the construction depends on the quality of the work of each participant and, in particular, on the organization and flow of information at the interfaces between these participants.

This book examines the various quality management systems applied to the construction industry in Hong Kong and other parts of the world. Hong Kong's experience is particularly important because it plays a leading role in construction quality management globally. The text traces the change from quality control (QC) practice in the 1970s and 1980s, to the quality assurance (QA) concept in the 1990s, and finally to the emerging total quality management (TQM) philosophy. All the tools and techniques used in relation to construction quality management are discussed in detail in the 12 chapters.

Doing Business 2016 is the 13th publication in a series of annual reports comparing business regulation in 189 economies. This year the publication addresses regulations affecting 10 areas of everyday business activity including: Starting a business Dealing with construction permits Getting electricity Registering property Getting credit Protecting minority investors Paying taxes Trading across borders Enforcing contracts Resolving insolvency Doing Business 2016 updates all indicators as of June 1, 2015, ranks economies on their overall ease of doing business, and analyzes reforms to business regulation identifying which economies are strengthening their business environment the most. This report illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 60 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,100 articles in peer-reviewed academic journals since its inception.

Since the first edition of this book was published, most developments in welding construction have been within the quality assurance element of the process rather than in welding technology itself. The continuous pressures from worldwide clients seeking better reliability from welded structures has focused much attention on to quality. The quality characteristic has a significant effect on safety and economy, and the never ending attention to cost effectiveness requires continuous attention to quality control and quality assurance. New materials, faster welding methods and the needs of economic design mean that such objectives must be carefully studied during the planning and execution of welded work. Quality Assurance in Welded Construction covers the essential aspects of the area, and is suitable for civil and structural engineering designers, welding engineers, manufacturing managers, inspectors and QA personnel. Included in the book are features and illustrations relating to defects in welded construction, a summary of essential data, and a substantial amount of information to assist in the task of getting welded structures right first time.

Sixteenth in a series of annual reports comparing business regulation in 190 economies, Doing Business 2019 measures aspects of regulation affecting areas of everyday business activity.

Don't let a construction lawsuit wipe you out. More and more construction contractors are getting sued these days. Make sure you protect yourself against costly litigation with Construction Insurance, Bonding and Risk Management edited by William J. Palmer, James Maloney, and John L. Heffron. Written in jargon-free language, this quick-and-easy resource will help you identify and manage risk in every phase of construction--from bidding on the job to driving home the final nail. You get the know-how you need to make sense of today's confusing array of insurance and bonds and to select the best coverage for your general business operations, individual contracts, job bidding and more.
