understanding of contemporary political controversies by comparing America to European countries.

In the realm of political discourse there is a distinct gap in understanding between Russia and the West. To an outsider, the ideas that animate the actions of Russia's ruling elite, opposition, and civil society - from the motivations driving Russia's political actors to the class structure and international and domestic constraints that shape Russia's political thinking - remain shrouded in mystery. Contrary to the view that a bleak discursive uniformity reigns in Vladimir Putin's Russia, *Political Ideologies in Contemporary Russia* shows that the country is engaging in serious theoretical debates across a wide spectrum of modern ideologies including liberalism, nationalism, feminism, and multiculturalism. Elena Chebankova argues that the nation is fragmented and the state seeks to balance the various ideological movements to ensure that none dominates. She shows that each of the main ideological trends is far from uniform, but the major opposition is between liberalism and traditionalism. The pluralistic picture she describes contests many current portrayals of Russia as an authoritarian or even totalitarian state. Offering an alternative to the Western lens through which to view global politics, *Political Ideologies in Contemporary Russia* is a major contribution to our understanding of this world power.
