My advice for
anyone looking
to engage an IT
vendor under
agile
methodology
would be: Make
sure you fully

understand agile delivery and be ready to "own" the product. If you can't own the product, don't go... Prepare to "unlearn" the waterfall method for contract relationship Adopt rapid ...

Contracting
agile - best
practices
Agile software
development
methods are now
being widely
used in the IT
sector and are
increasingly
being advocated
as preferable to
the traditional

waterfall

development model. However, contracting for Agile software development projects remains a challenge. Most standard software development contracts were designed for use with the

waterfall model and can be difficult to reconcile with the principles that underpin Agile working practices.

Contracting for Agile development projects

In an effort to allow for Agile Contracting, the following are a few steps that you can take: Familiarize your legal department with the Scrum Framework and Agile Principles as well as with how they differ from... These

new Agile contracts must include the concept of a delivery cycle. At the end of each ...

Contracting for
Agile Software
Development
Efforts ...
This form of

development and model of contract has been used and refined on many large-scale ICT contracts over the years. But there is now a new software development procedure that many in the sector feel is

better. This is agile development. Agile software development rejects traditional software processes in favour of a more fluid approach

...

Contracting for agile software development - agendaNi

Government solicitations to procure custom software are often long and complicated, include many pages of requirements, and can take

months — even
years — to
write. But an
agency can hire
an agile
software
contractor with
a solicitation
that's only a
dozen pages,
written in an
afternoon, using
our agile
contract format.

It can be done under existing procurement regulations and within contracting officers' existing authority.

Value vs Time:
an Agile
Contract Model
Agile
development is
unpredictable by
nature. Hence
unlike

traditional development contracts supplier's breach of contracts or sudden terminations are not applicable to agile contracts. Additionally, agile contracts provide the

flexible scope of evolution for resolving issues upfront which is also cost effective.
