The Solutions Manual, carefully revised by Peter Crabb of Northwest Nazarene University, contains solutions to all basic, intermediate, and challenge problems found at the end of each chapter. This supplement can be purchased by students with instructor approval or can be packaged with this text at a discount.

This new international edition provides increased coverage of the procedures for estimating the cost of capital, expanded coverage of risk management techniques and the use and misuse of derivatives, and additional coverage of agency problems.

Fundamentals of Corporate Finance helps students develop the intuition and analytical skills necessary to effectively apply financial tools in real-world decision-making situations. The text provides a fully integrated framework for understanding how value creation relates to all aspects of corporate finance: whether it be evaluating an investment opportunity, determining the appropriate financing for a business, or managing working capital. This unique and integrated framework also enables students to develop problem solving and decision-making skills. The authors believe that students who understand the intuition underlying the basic concepts of finance are better able to develop the critical judgments necessary to apply financial tools in real-world, decision-making situations. Their text develops intuitive thinking while simultaneously helping students develop problem solving and computational skills. It then shows students how to apply intuition and analytical skills to decision making, while integrating it all with valuation and building shareholder value.

Key features of this new edition include: New Real World Insights use well-known international companies such as Uber, Elringklinger GB, Apple, Google and Adidas, as well as drawing on world events, to show how companies put Corporate Finance into practice and how real world events affect their corporate finance decisions. New coverage in the International Corporate Finance chapter on Islamic finance. Updated Behavioural Finance chapter has been enhanced by new coverage in the subject area. Updated examples which use hypothetical examples to take students step-by-step through concepts in a clear and coherent manner to help their understanding and learning. The extensive end of chapter content has been updated with many brand new practice questions and problems, organized by level of difficulty. New to this edition is SmartBook with integrated learning resources. When engaged with SmartBook's adaptive reading experience, students are guided towards textbook content that has the maximum learning impact every time they study. This creates an entirely personalized learning experience for each individual student. The learning resources reinforce important concepts at precise moment they need help. --Publisher's description.

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Corporate Finance, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central

concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. The ninth edition has been fully updated to reflect the recent financial crisis and is now accompanied by Connect, an exciting new homework management system.

This revised and enhanced book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company's strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.
