**Abstract** There is no question that the topic of this meeting in Seeheim, Germany, on intracranial and intralabyrinthine fluids is pertinent. This was the first international meeting at which these two closely-related topics were addressed together. Combining the clinical and research aspects of fluid and pressure regulation in the intracranial and the intralabyrint hine compartments as well as discussions on the clinical implications of abnormal fluid pressure was an excellent idea. The presentations and discussions of both the clinicians and basic scientists who participated proved that the concept of having such a combined focused gathering was both original and relevant. The two topics of the meeting in Seeheim have much in common. Maintaining both the intracranial pressure (ICP) and the intralabyrinthine pressure within normal limits is important for the normal functions of both the central nervous system and the ear. The intracranial space and the intralabyrinthine space are closed compartments that communicate with each other in an intricate manner. Deviations from normal intracranial pressure result in specific symptoms and signs. Medical problems related to elevated intracranial pressure vary from subtle to severe. Accumulated knowledge indicates that there are adverse effects from even relatively small elevations in ICP. Elevations in ICP may cause injuries to the brain and the ear. Abnormal pressure in the ear may cause abnormal function and injury. Maintaining the intracranial pressure within normal limits depends on a normally functioning pressure regulation.

**Abstract** The founding fathers vision of democracy was transformed into a one dollar, one vote democracy. Wall Street and corporations own all the money and thus all the votes. A clash of civilizations is promoted as a scapegoat for capitalisms systemic failure

This volume explores the diverse ways in which the evolution of human behaviour can be investigated, and confronts the most challenging aspects of the subject.

There have been more changes to teaching and learning in higher education in the last 30 years than there were over the previous 500. Eminent contributors seek to make sense of these changes and place them within a framework for understanding changes in teaching and learning.

You Don't Owe Anyone is for perfectionists, workaholics, people pleasers, and strivers who feel stuck in the try-hard cycle. Sharing her experiences as a life coach and recovering perfectionist, Caroline Garnet McGraw shows us how we can free ourselves from the weight of expectations and encourages us to move our lives forward without apology. Inspired by the author's viral essay "You Don't Owe Anyone an Interaction," this book invites us to make surprising choices that can help us get unstuck. Rather than offering more ways to effect change through sheer effort, these personal stories serve as a compassionate witness, a reflection of our own perfectionistic tendencies. They also are a wakeup call jolting us out of our martyr mentality and inspiring us to move in new, positive directions. Through simple, accessible coaching practices, You Don't Owe Anyone shows us what it looks like to refuse to over-function in the old ways. It invites us to make the same surprising choices that have helped McGraw and her clients move past perfectionism, empowering us to quiet our fears and heal our hearts.

**Abstract** This book examines the power relationships that organize and facilitate quality assurance in higher education. It investigates power in terms of macro systems of accountability, surveillance and regulation, and uncovers the ways in which quality is experienced by academics and managers in higher education. Louise Morley reveals some of the hidden transcripts behind quality assurance and poses significant questions: \* What signs of quality in higher education are being performed and valued? \* What losses, gains, fears and anxieties are activated by the procedures? \* Is the culture of excellence resulting in mediocrity? Quality and Power in Higher Education covers a wide range of issues including: the policy contexts, new managerialism, the costs of quality assurance, collegiality, peer review, gender and equity implications, occupational stress, commodification and consumer values in higher education, performance, league tables, benchmarking, increasing workloads and the long-term effects on the academy. It draws upon Morley's empirical work in the UK on international studies and on literature from sociology, higher education studies, organization studies and feminist theory. It is important reading for students and scholars of higher education policy and practice, and for university managers and policy-makers.

The Nag Hammadi Scriptures, edited by Marvin Meyer, is the most complete, up-to-date, one-volume, English-language edition of the renowned library of Gnostic manuscripts discovered in Egypt in 1945, which rivaled the Dead Sea Scrolls find in significance. It includes the Gospel of Thomas, the Gospel of Mary, and the recently discovered Gospel of Judas, as well as other Gnostic gospels and sacred texts. This volume also includes introductory essays, notes, tables, glossary, index, etc. to help the reader understand the context and contemporary significance of these texts which have shed new light on early Christianity and ancient thought. The compilation of ancient manuscripts that constitute The Nag Hammadi Scriptures is a discovery that challenges everything we thought we knew about the early Christian church, ancient Judaism, and Greco-Roman religions.

Internet and intranet technologies offer tremendous opportunities to bring learning into the mainstream of business. E-Learning outlines how to develop an organization-wide learning strategy based on cutting-edge technologies and explains the dramatic strategic, organizational, and technology issues involved. Written for professionals responsible for leading the revolution in workplace learning, E-Learning takes a broad, strategic perspective on corporate learning. This wake-up call for executives everywhere discusses: □ Requirements for building a viable e-learning strategy □ How online learning will change the nature of training organizations □ Knowledge management and other new forms of e-learning Marc J. Rosenberg, Ph.D. (Hillsborough, NJ) is an independent consultant specializing in knowledge management, e-learning strategy and the reinvention of training. Prior to this, he was a senior direction and kowledge management field leader for consulting firm DiamondCluster International.

George Washington Sears tributes the great outdoors with a collection of poems chronicling life among nature in all its rugged glory. A committed outdoorsman, Sears was most at home among the trees and hills of America's wilderness. Each poem in this anthology chronicles a different aspect of life spent camping and living in the depths of nature, with only creatures for company. The author's affinity is plain to behold: he describes watching how a given animal behaves, how the weather unfolds amid the forest, how a camp feels like home, how overarching nature's majesty is. The invigorating aspect of being outdoors is admired by the author; the mountain air, tinged with the scents of trees, was thought to benefit health in the 19th century. Other aspects of the book recount movements of the era; temperence from alcohol, and conflicts with the Native Americans, are alluded to. George Washington Sears felt a sense of awe and wonder about nature while still a boy: his parent's books featuring Native Americans depicted a vast and beautiful habitats. Growing up to be a great lover of nature, Sears would often camp in the forests between working as a journalist and poet. He was an early proponent of the canoe as a means of exploring the rivers, and would undertake tours using these boats.
