The North African campaign, the struggle of the Italians and Germans against the Allies in Egypt, Libya and Tunisia between 1940 and 1943, was a war of movement and maneuver, of dramatic changes of fortune, and it was a war in which mechanized forces—tanks in particular—excelled. Compared with the heavily populated landscapes of northwest Europe, the empty open spaces of North Africa appeared to be ideal operating terrain for tanks, yet the harsh desert conditions tested men and machinery to the limit, as Anthony Tucker-Jones demonstrates in this remarkable selection of wartime photographs. The use of armor during the entire course of the campaign is covered, from the initial Italian offensive, the arrival of Rommels Panzergruppe Afrika, the battles fought along the North African shore which culminated in El Alamein, then the Allied advance into Tunisia which led to the final defeat of the German and Italian armies. The images give a fascinating inside view of combat, but they also reveal the daily routines of tank warfare 65 years ago, and give a vivid impression of what it was like to fight in and live with the tanks of the day the German Mk IIIs and Mk IVs and the Tiger, the British Matildas and Valentines and the American Grants and Shermans that contributed so much to the Allied victory. Training, maintenance, transportation and supply are shown, as are the daily lives of the tank crews and extreme conditions in which they worked and fought.

During the first years of the Second World War, Allied forces endured a series of terrible defeats at the hands of the Germans, Italians and Japanese. Their tanks were outclassed, their armored tactics were flawed. But the advent of new tank designs and variants, especially those from the United States, turned the tables. Although German armor was arguably still superior at the end of the war, the competence of Allied designs and the sheer scale of their production gave them a decisive advantage on the armored battlefield. This is the fascinating story that Anthony Tucker-Jones tells in this book which is part of a three-volume history of armored warfare during the Second World War. Chapters cover each major phase of the conflict, from the early blitzkrieg years when Hitler's Panzers overran Poland, France and great swathes of the Soviet Union to the Allied fight back in tank battles in North Africa, Italy and northern Europe. He also covers less-well-known aspects of the armored struggle in sections on Allied tanks in Burma, India and during the Pacific campaign. Technical and design armored are a key element in the story, but so are changes in tactics and the role of the tanks in the integrated all-arms forces that overwhelmed the Axis.

Christian Faith in Contemporary Society is a comprehensive primer on biblical literacy written especially for: Baby Boomers and others who by reason of illness or aging are contemplating their mortality and wish to explore Christian claims of eternal life, Non-believing singles contemplating dating a devout Christian, who wish to know what they may be in for should they fall in love, Mature Christians whose intelligent, highly-educated children or grandchildren are rejecting the faith, Christians who wish to increase their knowledge of the faith for personal spiritual growth and greater effectiveness in presenting the faith to others, and The curious uninitiated who would like in-depth knowledge of what the Christian faith is all about. The author, a Harvard lawyer, has applied his professional skills to conduct a forensic analysis of the most formidable premise of the Christian faith—the resurrection of Jesus from the dead and his ascension into heaven while still alive—and reports on the results of that analysis. Because Christianity has played a key role in the development of Western civilization, a knowledge of Christianity is necessary for a proper understanding of our society. This book can help the reader gain that knowledge.

In God's Battalions, award-winning author Rodney Stark takes on the long-held view that the Crusades were the first round of European colonialism, conducted for land, loot, and converts by barbarian Christians who victimized the cultivated Muslims. To the contrary, Stark argues that the Crusades were the first military response to unwarranted Muslim terrorist aggression. Stark reviews the history of the seven major Crusades from 1095 to 1291, demonstrating that the Crusades were precipitated by Islamic provocations, centuries of bloody attempts to colonize the West, and sudden attacks on Christian pilgrims and holy places. Although the Crusades were initiated by a plea from the pope, Stark argues that this had nothing to do with any elaborate design of the Christian world to convert all Muslims to Christianity by force of arms. Given current tensions in the Middle East and terrorist attacks around the world, Stark's views are a thought-provoking contribution to our understanding and are sure to spark debate.
