A supply chain is a network of retailers, distributors, transporters, storage facilities and suppliers that participate in the sale, delivery and production of a particular product. The concept of supply chain often involves backward integration - acquiring ownership of one's supply chain (in the hope of reducing supplier power and thus reducing input costs). The four major functional components are: demand planning manufacturing planning and scheduling supply planning transportation planning The Certified Supply Chain Professional (CSCP) certification is essential for professionals involved in the areas of supplier and customer relations, international trade, the use of information technology to enable the supply chain, and physical logistics. Candidates must pass a 3-module exam in order to earn the CSCP designation. The modules are: Module 1 - Supply Chain Design Module 2 - Supply Chain Planning and Execution Module 3 - Supply Chain Improvements and Best Practices There are overlapping knowledge, and it is suggested that you study these modules together. Officially, CPIM focuses primarily on manufacturing and provides an in-depth view of materials management, master scheduling, production planning, forecasting, and quality improvement within an organization, while CSCP takes a broader view to encompass all steps throughout the supply chain. In reality, the CSCP exam and the CPIM BSCM exam share a lot of common topics on SCM. This ExamFOCUS Study Notes builds a solid focus while revisiting key examination topics relevant to the CSCP exam (and also to the first CPIM module - BSCM). It helps in straight-forward fundamental knowledge establishment. The real CSCP exam questions do not appear to be as straight forward though. In fact, many questions are presented to do nothing other than to get you totally confused... Just bear in mind, you will need to do a lot of logical thinking to figure out the best possible answers, and you must be able to link multiple concepts together....

The Certified Supply Chain Professional (CSCP) certification is essential for professionals involved in the areas of supplier and customer relations, international trade, the use of information technology to enable the supply chain, and physical logistics. A practical handbook to cybersecurity for both tech and non-tech professionals As reports of major data breaches fill the headlines, it has become impossible for any business, large or small, to ignore the importance of cybersecurity. Most books on the subject, however, are either too specialized for the non-technical professional or too general for positions in the IT trenches. Thanks to author Nadean Tanner's wide array of experience from teaching at a University to working for the Department of Defense, the Cybersecurity Blue Team Toolkit strikes the perfect balance of substantive and accessible, making it equally useful to those in IT or management positions across a variety of industries. This handy guide takes a simple and strategic look at best practices and tools available to both cybersecurity management and hands-on professionals, whether they be new to the field or looking to expand their expertise. Tanner gives comprehensive coverage to such crucial topics as security assessment and configuration, strategies for protection and defense, offensive measures, and remediation while aligning the concept with the right tool using the CIS Controls version 7 as a guide. Readers will learn why and how to use fundamental open source and free tools such as ping, tracer, PuTTY, pathping, sysinternals, NMAP, OpenVAS, Nexpose Community, OSSEC, Hamachi, InSSIDer, Nexpose Community, Wireshark, Solarwinds Kiwi Syslog Server, Metasploit, Burp, Clonezilla and many more. Up-to-date and practical cybersecurity instruction, applicable to both management and technical positions • Straightforward explanations of the theory behind cybersecurity best practices • Designed to be an easily navigated tool for daily use • Includes training appendix on Linux, how to build a virtual lab and glossary of key terms The Cybersecurity Blue Team Toolkit is an excellent resource for anyone working in digital policy as well as IT security professionals, technical analysts, program managers, and Chief Information and Technology Officers. This is one handbook that won't gather dust on the shelf, but remain a valuable reference at any career level, from student to executive.
