(Episode 8) Cultural Geography Form And Process

Cultural geography is one of the two major branches of geography (versus physical geography) and is often called human geography. Cultural geography is the study of the many cultural aspects found throughout the world and how they relate to the spaces and places where they originate and then travel as people continually move across various areas.

~~Cultural Geography Overview - ThoughtCo~~

Cultural geography is a subfield within human geography. Though the first traces of the study of different nations and cultures on Earth can be dated back to ancient geographers such as Ptolemy or Strabo, cultural geography as academic study firstly emerged as an alternative to the environmental determinist theories of the early 20th century, which had believed that people and societies are controlled by the environment in which they develop. Rather than studying pre-determined regions based upo

~~Cultural geography—Wikipedia~~

Dissatisfied with 'traditional' American cultural geography's focus on material culture and landscape, and the epistemological tug-of-war between humanistic and radical approaches, many cultural geographers have worked to reconceptualize culture and explore ways to bridge the gap between what were once thought to be incompatible epistemological positions. This has resulted in a pluralization of approaches to literature as an object of geographical analysis as well as a diversification ...

Cultural geography involves studying how the physical environment interacts with the traditions of people. To understand cultural geography, let's go back to Rishi and Lin for a moment. Rishi lives...

~~Human & Cultural Geography: Definition, Characteristics ...~~

Cultural geography as a subdiscipline has long argued for the importance of cultural artifacts of many kinds in mediating human experiences of place, space and landscape. Much of this work continues to be shaped by concepts developed as part of what was called 'the new cultural geography'. As is well-known, the new cultural geography emerged in the second half of the 1980s, when influential

~~Cultural production—Oxford Reference~~

The major geographical processes that form and transform coastal environments are erosion, transportation, and deposition. Coastal erosion wears and breaks off materials along the coastline. Transportation is when sediment is transported by currents, rivers, and constructive waves to a destination. Deposition describes how sediment builds up coastal landforms due to transportation.

In addition to the technique of participant-observation, the contemporary ethnographer usually selects and cultivates close relationships with individuals, known as informants, who can provide specific information on ritual, kinship, or other significant aspects of cultural life. In this process also the anthropologist risks the danger of biased viewpoints, as those who most willingly act as informants frequently are individuals who are marginal to the group and who, for ulterior motives (e ...
