The continued strength of the yen limited Daihatsu’s earnings from foreign markets, leading it to withdraw from the United States in 2011 and, two years later, from Europe.

The main topic of this book is the introduction of a new mobility service: One-Way and Open-End car-sharing. Dr. Bodo Schwieger describes a process starting from the anticipation and measurement of customer's needs to the introduction of innovative services. The described field test is second to none, as it offers gasoline vehicles in a One-Way rental scheme within an urban environment: 25 Smart vehicles were based at 8 stations and available to 4,000 car-sharing customers. This service is being analyzed for efficiency and customer reactions. In a second step, other car-sharing companies in Hamburg (Germany), Seattle (Washington), Kyoto and Tokyo (Japan) are analyzed for their approaches to improving their services. combines technological competence, marketing know-how and customer analysis. Car-sharing has recently become a highly relevant topic with the fast expansion of the American providers and the market entry of Deutsche Bahn AG and Shell AG in Germany. The method respects the large amount of interdependence with other services and also the multiplicity of different customer groups. Thus it can be transferred to other (transportation) services - and used as a beginner's guide to service analysis. The book is based on the author's dissertation, which was accepted at the Technical University of Berlin in 2003. It delivers, on 150 pages, densely accumulated information. It is worth reading for anyone who is involved in introducing and developing new services, either within transportation or in related branches.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories.
