## This Activity You W ...

The Spaghetti will react with the amount of of baking soda and vinegar.the baking soda powder will clog up and flow to the bottom. The density of the noodle is low and there is fluid dense surrounding it. The noodles density decreases due to the bubbles that gets attached to the noodles.

## Dancing Spaghetti by - Prezi

It needs some “ magic potion ” . Add 4 tablespoons/a splash of vinegar to the baking soda and water. The mixture should fizz and bubble, but if it does not fizz or bubble add a bit more vinegar. Allow the students to observe what they have done. The pasta begins to float up and then down in the water and it appears as though the spaghetti is dancing!

Spaghetti Bridge Lab Students find a relationship between the number of spaghetti strands making a "bridge" and the largest number of masses that can be supported. This activity provides a great environment for discussing independent, dependent and control of variables. Students should also graph their data and write an equation for the graph.

## Dancing Spaghetti : 5 Steps - Instructables

From doing the Dancing Spaghetti Lab, I learned that if you mix water, vinegar, and baking soda, it create CO<sub>2</sub> bubbles. I found a number of things to be interesting. For example, I found that the water and vinegar solution fizzes up when you add baking soda to it; also that amateur video editing is quite time consuming (trying to figure out the features ie: sound, brightness, filters, etc.), yet relaxing in a way.
