## **Data Architecture From Zen To Reality**

In information technology,  
data architecture is  
composed of models,  
policies, rules or standards  
that govern which data is  
collected, and how it is  
stored, arranged,  
integrated, and put to use  
in data systems and in

# Access Free Data Architecture From Zen To Reality

organizations. Data is usually one of several architecture domains that form the pillars of an enterprise architecture or solution architecture.
