D7500! The Nikon
D7500 is a midrange
APS-C DSLR that both
sits below and borrows

Where To Download David

a lot from Nikon's APS-C flagship D500 including its 20.9MP sensor, high-res metering sensor (used for subject recognition) and very probably its image processor. In a lot of ways, it's like a mini D500, which in and of itself is like a mini D5. All three are built for speed. The D7500 gets a 2 fps bump over its

Where To Download David

predecessor and can shoot 8 fps for an impressive 100+ JPEGs (3x the buffer of the D7200). That's not quite as fast as the D500's 10 fps burst, but it's still serious firepower for enthusiasts and serious photographers alike. Its AF system remains the same, reliable 51-point module from D7200 and D7100. But the new

metering sensor should mean better 3D Tracking. If you haven't guessed by now, this is a great camera for fast action photography.
