The road to sustainable urban logistics. In 2017, UPS and GreenBiz conducted research to better understand the perceptions and challenges related to city logistics, and to uncover solutions and strategies that can contribute to a more environmentally sustainable urban center. Nearly two-thirds of research respondents felt there was insufficient collaboration across sectors, and 72 percent noted that businesses should work closely with city officials to identify and address urban ...

2018-05-24. By Tamara Barker, UPS Chief Sustainability Officer. The growth of e-commerce and the expectation of immediate delivery is transforming how we buy everyday goods. We have become accustomed to getting what we want, when and where we want it. Thus, the logistics of moving goods around—namely warehousing, transportation, and delivery—are becoming some of the most critical development challenges for rapidly growing cities around the world.

Delivering Sustainable Urban Logistics | Supply Chain ...
These deliveries can be shifted to sustainable delivery options using non-motorized vehicles, and the use of electric vans should be promoted to improve efficiency and performance of the urban freight system. Low-emission alternatives to road transport, such as waterways and urban rail can also reduce emissions. 2.
