Demonic Males is every bit as stimulating read. It is clearly a book based on field observations. It develops theories about chimpanzee and human violence based on the evidence not only of Richard and Dale's own observations, but also from a whole range of studies of a wide variety of species.

Demonic Males: Apes and the Origins of Human Violence ...

Demonic Males offers startling new answers to these questions. Drawing on the latest discoveries about human evolution and about our closest living relatives, the great apes, the book unfolds a compelling argument that the secrets of a peaceful society may well be, first, a sharing of power between males and females, and second, a high level and variety of sexual activity, both homosexual and heterosexual.

Demonic Males: Apes and the Origins of Human Violence ...

Demonic Males begins by explaining that humans, chimpanzees, bonobos, gorillas, and orangutans are a group of genetically related great apes, that humans are genetically closer to chimps than chimps are to gorillas, and that chimps and bonobos are most closely genetically related. After speculating about what enabled humans' ancestors to leave the rainforest (the use of roots as sources of water and food), Demonic Males next provides a catalog of the types of violence practiced

Demonic Males - Wikipedia

Demonic Males draws a comparison between humans and chimpanzees (which share 98% of the same DNA) in the way both species engage in violence with other members of the species. The assumption (although never stated explicitly) is that humans and chimps engage in the same kinds of internecine violence because we share the same evolutionary developmental path.
