AV Receiver - Denon

Yes, you could use the zone 2 pre-out into an integrated amp and use the Denon AVR as a source (eg for digital music). You would have to try it and see how it sounds, as the pre-amp of the Denon would still have an effect. Generally you would connect your music sources directly to the integrated amp to get the best possible sound quality.

Answered - Power Amp to go with Denon AVR | AVForums

This amp boasts 125W of amplification (into 8ohms with two channels driven) across each of its nine channels, giving you native access to Dolby Atmos and DTS:X speaker configurations up to 7.2.2 or 5.2.4, while the 11.2-channel processing means you can go right up to 7.2.4 if you're prepared to add an extra two-channel amplifier.
