~~design — Martin Fowler~~

Martin Fowler (18 December 1963) is a naturalized American software developer, author and international public speaker on software development, specialising in object-oriented analysis and design, UML, patterns, and agile software development methodologies, including extreme programming.. His 1999 book Refactoring popularised the practice of code refactoring.

~~Martin Fowler (software engineer) — Wikipedia~~

Martin Fowler A website on building software effectively If there's a theme that runs through my work and writing on this site, it's the interplay between the shift towards agile thinking and the technical patterns and practices that make agile software development practical.

~~Martin Fowler~~

Martin Fowler. evolutionary design. domain driven design. application architecture. Domain-Driven Design is an approach to software development that centers the development on programming a domain model that has a rich understanding of the processes and rules of a domain. The name comes from a 2003 book by Eric Evans that describes the approach through a catalog of patterns. Since then a ...

Software Architecture Guide. When people in the software industry talk about "architecture", they refer to a hazily defined notion of the most important aspects of the internal design of a software system.

~~Software Architecture Guide — Martin Fowler~~

Is Design Dead? For many that come briefly into contact with Extreme Programming, it seems that XP calls for the death of software design. Not just is much design activity ridiculed as "Big Up Front Design", but such design techniques as the UML, flexible frameworks, and even patterns are de-emphasized or downright ignored. In fact XP involves a lot of design, but does it in a different way ...
