A multi-storey building is a building that has multiple storeys, and typically contains vertical circulation in the form of ramps, stairs and lifts . The number of storeys is determined according to the diagram below: [Image source: Approved Document B2, ‘ Fire safety: Buildings other than dwellinghouses ’]

### Multi-storey building - Designing Buildings Wiki

This is a presentation dealing with the Construction And Design Of A Multi storied Residential Building. It covers the step by step information about how the construction process actually takes place at a site. So if you are keen to know more about the construction details just download this ppt. We are thankful to Er.

### Construction And Design Of A Multistoried Residential Building

Since the thermal expansion of concrete is different from that of masonry. The interface between the concrete and the masonry is liable to crack. To avoid this crack the chicken wire mesh is used to avoid the crack and also provides the better grip for Masonry with concrete. Similarly when the drainage pipes are laid along with the outer wall then again the connection between the pipe and
