The Factory Design Pattern allows you to separate the object construction code from the code that actually uses the object. This makes it easier to extend the object construction code, independently from the rest of the code! Use the Factory Pattern when: you don't know ahead of time what class object you might need

~~Factory Design Pattern – Easy way to learn design patterns~~

Inside `RoundedSquare::draw()` method. Singleton Pattern. Singleton pattern is one of the simplest design patterns in Java. This type of design pattern comes under creational pattern as this pattern provides one of the best way to create an object.

try to understand what Design Patterns are by using some examples. Farhana: Sure, I love examples. Shubho: Let's talk about our car. It's an object, though a complex one, which consists of thousands of other objects such as the engine, wheels, steering, seats, body, and thousands of different parts and machinery.

~~How I explained Design Patterns to my wife: Part 1 ...~~

Draw a line at the center of a symmetrical design. You'll easily notice that the left side is a mirror image of the right side. These kinds of designs are very common, but still beautiful. If you draw the same line on an asymmetrical design, the left side does not look anything like the right side.
