Dietitian's Guide to Assessment and Documentation takes an investigative approach to nutrition assessment reviewing the collection and analysis of evidence to determine the real nutrition-related problem, understanding the underlying problem and its effect on nutritional status, and providing intervention to address the problem - thereby improving nutritional health. This text will help students learn how to formulate interview questions, how to create goals and patient teaching strategies, how to interpret lab data, how to write a care plan and how to document in a medical record. This book is needed to help the dietitian do a thorough assessment and understand the proper documentation to prevent lawsuit, or defend the dietitian in a lawsuit, as well as prepare the dietitian for Joint Commission or State survey. Includes a reference section for interpretation of lab data and an appendix with commonly used abbreviations."

Dietitian's Guide to Assessment and Documentation takes an investigative approach to nutrition assessment — reviewing the collection and analysis of evidence to determine the real nutrition-related problem, understanding the underlying problem and its effect on nutritional status, and providing intervention to address the problem - thereby improving nutritional health. This text will help students learn how to formulate interview questions, how to create goals and patient teaching strategies, how to interpret lab data, how to write a care plan and how to document in a medical record. This book is needed to help the dietitian do a thorough assessment and understand the proper documentation to prevent lawsuit, or defend the dietitian in a lawsuit, as well as prepare the dietitian for Joint Commission or State survey. Includes a reference section for interpretation of lab data and an appendix with commonly used abbreviations.

This edition is substantially revised, with a new chapter on the Nutrition Care Process, updated information on nutrition screening, thorough coverage of the five categories of nutrition assessment data, evidence-based guidance on estimating energy and nutrient requirements, additional anatomical illustrations and an expanded glossary.

"This comprehensive, easy-to-navigate guide has been updated to include information on the use of CDC, WHO, and specialized growth charts; vitamin D recommendations; and screening information. It also features expanded, easier-to-read coverage of laboratory tests and nutrient needs. An essential tool for any RDN who provides nutrition care to pediatric patients!"--

Health Sciences & Nutrition

The Complete Guide to Nutrition in Primary Care Edited by Darwin Deen, MD, MS Lisa Hark, PhD, RD Clinicians and patients agree that primary care office visits should include routine nutrition assessment and counseling. But how do you fit it into an already crowded consultation? And what is the most up-to-date advice? With The Complete Guide to Nutrition in Primary Care, Drs. Deen and Hark provide the necessary tools. This comprehensive overview of nutrition answers your questions on:

- Nutrition as Preventive Medicine
- Nutrition through the Lifecycle
- Improving Health by Changing Diet and Lifestyle Behaviors
- Vitamins, Minerals, Dietary Supplements, and the Alternative
- Successful Changes to the Environment

This timely paperback contains everything the primary care clinician needs to counsel patients on diet and lifestyle issues. Keep it close at hand for the frequent consultation it is sure to receive. Dr. Darwin Deen is one of the nation's foremost authorities on nutrition. Currently Professor of Clinical, Family and Social Medicine and Director of Medical Student Education at the Albert Einstein College of Medicine in New York, he has trained a generation of physicians on the connection between nutrition and health. He has played a leading role in revising medical school curricula to incorporate nutrition training. An award-winning teacher and noted author, he serves as Chair of the Task Force on Medical Nutrition Education of the American College of Nutrition and co-chairs the Group on Nutrition of the Society of Teachers of Family Medicine. His years of experience as a family physician make him perfectly suited to advise clinicians on counseling their patients on diet and lifestyle. Dr. Lisa Hark is a renowned family nutrition expert, with more than 20 years of experience in nutrition counseling and promoting the benefits of healthy eating in children and adults. As Director of the Nutrition Education Program at the University of Pennsylvania School of Medicine in Philadelphia, she developed a model medical school curriculum and textbook, Medical Nutrition and Disease, which has become one of the most widely used texts in nutrition education. She was given the Excellence in Medical/Dental Nutrition Education award from the American Society for Nutrition. Dr. Hark was also the host of the TV show, "Honey, We're Killing the Kids," which airs on TLC, and is a widely sought after speaker who communicates nutrition concepts effectively to health professionals, patients, and the media. This evidence-based tool is a comprehensive guide to nutrition assessment and nutrient requirements of infants and children - from birth to 18 years of age. Screening and risk assessment, anthropometric assessment, health history and development, diet and feeding assessment, assessment of the family environment, and macronutrient and micronutrient requirements are covered. Includes the most recent recommendations of the Expert Committee on the Assessment, Prevention and Treatment of Child and Adolescent Overweight and Obesity.
