Pen & Sword Books are proud to be re-issuing this the only book that the legendary 'legless' ace Douglas Bader (immortalised by the film Reach For The Sky) wrote. He tells the inspiring story of the Battle of Britain from the viewpoint of 'The Few'. Using superb illustrations he traces the development of the Spitfire and Hurricane and describes the nail-biting actions of those who flew them against far superior numbers of enemy aircraft. As an added bonus, other well-known fighter aces including Johnnie Johnson, 'Laddie' Lucas and Max Aikten contribute to Douglas's book, no doubt out of affection and respect. This is a really important contribution to RAF history by one of the greatest -and certainly the most famous - pilot of the Second World War.

Douglas Bader was a legend in his lifetime. After losing both legs in a 1931 air crash and being dismissed by the Royal Air Force, he fought his way back into the cock-pit of a Spitfire and became one of the great heroes of the Battle of Britain. Bader's story is so extraordinary that no one would dare invent

it, and his accomplishments have been an inspiration to many. Told he would never walk without a cane, Bader became not only one of the RAF's top combat pilots but a squadron leader and innovator of fighter tactics. Among the thrilling incidents chronicled in this book are his first successful encounter with an enemy plane, the shoot down of his own plane, and his succession of escapes from the Germans.

Douglas Bader was a legend in his lifetime and remains one today 100 years after his birth. A charismatic leader and fearless pilot he refused to let his severe disability (loss of both legs in a flying accident) ground him. He fought the authorities as ruthless as he did the enemy and not only managed to return to the front line but became a top scoring ace. His innovative tactics (The Big Wing) ensured his promotion and he led a key group of squadrons during the dark days of the Battle of Britain. His luck ran out when he was shot down and captured; he only escaped his burning fighter by cutting away one of his artificial legs. As a POW he was a thorn in the Germans side and he was sent to Colditz Castle. As this perceptive book reveals Bader, the hero, was at times a difficult overbearing man, no doubt in part due to the pain he suffered. But his strengths far outweighed his weaknesses and his place in the annals of British history is secure. This is a timely

republication of an important biography.

A biography of heroic RAF fighter pilot Douglas Bader who fought throughout the Battle of Britain despite having lost both his legs in an earlier aircraft crash. Without doubt the most famous RAF fighter ace of World War II, Douglas Bader joined the airforce in 1928, but was invalided out after an horrific crash in 1931 cost him both his legs. After learning to walk and fly again, Bader rejoined the RAF in 1939, fighting over Dunkir and in the Battle of Britain. In August 1941 Bader was brought down over German-occupied France and captured. After a number of escape attempts, Bader was moved to Colditz. This book chronicles Bader's amazing career.

out of the RAF. At the outbreak of war in 1939 he was recalled to the RAF and returned to flying. He fought in the Battle of Britain and later in nearly one hundred offensive fighter patrols. Following a mid-air collision he was captured and became a prisoner-of-war and was imprisoned in Colditz. The story of his war-time activities, both in the air and as a POW, is told in some detail and makes fascinating reading. These activities helped him to achieve celebrity status and in later life much of his time was given to promoting causes for the disabled. John Frayn Turner's account of a remarkable life is a fitting tribute to one of the country's most heroic figures.

Group Captain Sir Douglas Bader, whose dazzling success as a fighter pilot with artificial legs made him a national hero, was a British national treasure. His courage was remarkable, as was the way he defied his handicap. The film *Reach for the Sky* brought Bader's life into cinemas, and Robert Jackson's classic biography was the first to document his life. After a lonely childhood Bader's early reputation as a sportsman and a daredevil made him popular with his contemporaries. But he was also an irritation to his superiors, a pattern which continued throughout his life, and hid an academic ability which won him a scholarship to St Edward's School and a cadetship at the elite

RAF College in Cranwell. After his accident, Bader was determined to rejoin the RAF. As a pilot, he was an tactical innovator, a man who confronted the methods of other pilots. When he was a Prisoner of War, Bader's antagonism toward his guards, and his political pronouncements in later life, sometimes provoked his colleagues, but never lost him their lasting respect and admiration. After retiring from the RAF he combined a full-time job with Shell with all the demands of being a celebrity; his inspiration to the disabled gained him many accolades and finally a knighthood. Both aggressive and charming, Bader's outward personality was famous. Robert Jackson describes the evolution of that forceful character, and the motivation behind his remarkable achievements. 'Its style and structure make it readily accessible and, like your favourite armchair, it is easy to relax into at the end of a busy day.' Frank Burns Robert Jackson has been a full-time author since 1969, specializing in aviation and military history. A retired member of the Royal Air Force Volunteer Reserve, he has flown a wide variety of aircraft, ranging from jets to gliders.
