In the winter of 1959, nine hikers vanished under eerie circumstances on the slopes of the Northern Ural Mountains in Russia. A month later their corpses were found, maimed and broken by eldritch forces. This incident has provoked wild speculation among even the most skeptical crowds, stimulated discussion among every conspiracy theorist in Russia, and haunted the imagination of many a hiker for half a century. Recently, the mystery of so-called "Dyatlov Pass" has undergone a renaissance of interest and has gained international publicity and coverage in the news, Hollywood, and literature. This book provides, in an easy-to-read format, comprehensive, bias-free coverage of the incident--complete with medical autopsy reports, excerpts from legal proceedings connected with the deaths of the hikers, and testimonies from the first responders who found the bodies. In short, this book contains everything one needs to join the ranks of thousands of people trying to uncover the secrets of the Dyatlov Pass.

A New York Times and Wall Street Journal bestseller – What happened that night on Dead Mountain? The mystery of Dead Mountain: In February 1959, a group of nine experienced hikers in the Russian Ural Mountains died mysteriously on an elevation known as Dead Mountain. Eerie aspects of the incident—unexplained violent injuries, signs that they cut open and fled the tent without proper clothing or shoes, a strange final photograph taken by one of the hikers, and elevated levels of radiation found on some of their clothes—have led to decades of speculation over what really happened. As gripping and bizarre as Hunt for the Skin Walker: This New York Times bestseller, Dead Mountain: The Untold True Story of the Dyatlov Pass Incident, is a gripping work of literary nonfiction that delves into the mystery of Dead Mountain through unprecedented access to the hikers' own journals and photographs, rarely seen government records, dozens of interviews, and the author's retracing of the hikers' fateful journey in the Russian winter. You'll love this real-life tale: Dead Mountain is a fascinating portrait of young adventurers in the Soviet era, and a skillful interweaving of the hikers' narrative, the investigators' efforts, and the author's investigations. Here for the first time is the real story of what happened that night on Dead Mountain.

Height 1079 was the name of the mountain where the nine members of the Dyatlov trekking group perished in 1959. The bizarre circumstances of their death and the ensuing frenzy surrounding the incident brought to attention the original name given to the place by the local Mansi people - Kholat Syakhl, or Dead (Barren) Mountain. Until now, there has been no plausible explanation of what actually happened on that fateful night of February 1, 1959. This book offers a startling new theory, based on well-documented evidence rather than wild speculations, that finally ties together all of known facts about the Dyatlov mystery into a credible sequence of causes and effects. This book is also available in Russian <https://www.amazon.com/dp/B08V3GYL9V/> and German <https://www.amazon.com/dp/B09LT4YTQQ/>

NAMED A NEW YORK TIMES NOTABLE BOOK OF 2017#1 New York Times and #1 Wall Street Journal bestseller! A five-hundred-year-old legend. An ancient curse. A stunning medical mystery. And a pioneering journey into the unknown heart of the world's densest jungle. Since the days of conquistador Hernán Cortés, rumors have circulated about a lost city of immense wealth hidden somewhere in the Honduran interior, called the White City or the Lost City of the Monkey God. Indigenous tribes speak of ancestors who fled there to escape the Spanish invaders, and they warn that anyone who enters this sacred city will fall ill and die. In 1940, swashbuckling journalist Theodore Morde returned from the rainforest with hundreds of artifacts and an electrifying story of having found the Lost City of the Monkey God—but then committed suicide without revealing its location. Three quarters of a century later, bestselling author Doug Preston joined a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety, single-engine plane carrying the machine that would change everything: lidar, a highly advanced, classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains, that flight revealed the unmistakable image of a sprawling metropolis, tantalizing evidence of not just an undiscovered city but an enigmatic, lost civilization. Venturing into this raw, treacherous, but breathtakingly beautiful wilderness to confirm the discovery, Preston and the team battled torrential rains, quickmud, disease-carrying insects, jaguars, and deadly snakes. But it wasn't until they returned that tragedy struck: Preston and others found they had contracted in the ruins a horrifying, sometimes lethal and incurable disease. Suspenseful and shocking, filled with colorful history, hair-raising adventure, and dramatic twists of fortune, THE LOST CITY OF THE MONKEY GOD is the absolutely true, eyewitness account of one of the great discoveries of the twenty-first century.

A New York Times Best Book of the Year A Time Best Book of the Year A Kirkus Reviews Best Nonfiction Book of the Year 2020 Andrew Carnegie Medals for Excellence Winner From journalist Adam Higginbotham, the New York Times bestselling "account that reads almost like the script for a movie" (The Wall Street Journal) a powerful investigation into Chernobyl and how propaganda, secrecy, and myth have obscured the true story of one of the history's worst nuclear disasters. Early in the morning of April 26, 1986, Reactor Number Four of the Chernobyl Atomic Energy Station exploded, triggering one of the twentieth century's greatest disasters. In the thirty years since then, Chernobyl has become lodged in the collective nightmares of the world: shorthand for the spectral horrors of radiation poisoning, for a dangerous technology slipping its leash, for ecological fragility, and for what can happen when a dishonest and careless state endangers its citizens and the entire world. But the real story of the accident, clouded from the beginning by secrecy, propaganda, and misinformation, has long remained in dispute. Drawing on hundreds of hours of interviews conducted over the course of more than ten years, as well as letters, unpublished memoirs, and documents from recently-declassified archives, Adam Higginbotham brings the disaster to life through the eyes of the men and women who witnessed it firsthand. The result is a riveting, deeply reported reconstruction (Los Angeles Times) and a definitive account of an event that changed history: a story that is more complex, more human, and more terrifying than the Soviet myth. "The most complete and compelling history yet!" (The Christian Science Monitor), Higginbotham's "superb, enthralling, and necessarily terrifying...extraordinary" (The New York Times) book is an indelible portrait of the lessons learned when mankind seeks to bend the natural world to his will—lessons which, in the face of climate change and other threats, remain not just vital but necessary.

China and Russia are rising economic and political powers that share thousands of miles of border. Despite their proximity, their interactions with each other - and with their third neighbour Mongolia - are rarely discussed. Although the three countries share a boundary, their traditions, languages and worldviews are remarkably different. Frontier Encounters presents a wide range of views on how the borders between these unique countries are enacted, produced, and crossed. It sheds light on global uncertainties: China's search for energy resources and the employment of its huge population, Russia's fear of Chinese migration, and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources. Bringing together anthropologists, sociologists and economists, this timely collection of essays offers new perspectives on an area that is currently of enormous economic, strategic and geo-political relevance.

Nine university students mountaineering in the Urals go missing, and are later uncovered from the snows of a bleak forest's edge in the Siberian Taiga, in a series of grisly discoveries. Why were the climbers wearing no boots? Why were stout branches of the forest pines singed to a height of thirty feet? What were the mysterious markings in the bark of nearby trees? What was so-called "overwhelming force" that was capable of breaking eight ribs in a single blow without bruises? Why the KGB infiltrated all the search parties and attended the funerals? Why the clothes were tested for radiation? A real story that happened in Russia in 1959 and has become one of the world's creepiest mysteries. New information, new analysis, new intelligence - the answer will astound you

An American true-crime writer sets out to retrace the steps of nine hikers who died violent deaths in the Russian wilderness in 1959. However, nothing can prepare him for what he is about to discover...

WINNER OF THE ORWELL PRIZE WINNER OF THE CORNELIUS RYAN AWARD FINALIST FOR THE LIONEL GELBER PRIZE FINANCIAL TIMES BOOK OF THE YEAR "Fast-paced and excellently written." "New York Times "Filled with sparkling prose and deep analysis." "The Wall Street Journal An essential analysis to understanding Putin's playbook and understanding the real Russian threat to World order and peace How did a country that embraced freedom over twenty-five years ago end up as an autocratic police state bent once again on confrontation with the West? In this Orwell Prize-winning book, Arkady Ostrovsky reaches back to the darkest days of the Cold War to tell the story of Russia's stealthy and largely unchronicled post-Soviet transformation. A highly regarded Moscow correspondent for the Economist, Arkady Ostrovsky comes to this story both as a participant and a foreign correspondent. His knowledge of many of the key players allows him to explain the phenomenon of Valdimir Putin - his rise and astonishing longevity, his use of hybrid warfare and the alarming crescendo of his military interventions. In his new paperback preface, Ostrovsky explores how Putin influenced the US election, the Trump Putin access, and shows how Putin's methods - weaponizing the media and serving up fake news - came to enter American politics.

In February 1959, a group of friends went on a ski-hiking trip to a remote mountain in the northern Urals. Something killed them. Fifty years later, a man is discovered wandering in the wilderness, exhausted and terrified...
