The Proteus MPS was the first keyboard synthesizer E-MU produced. It was based on the Proteus/1 module, consisting of the same instruments but with different presets. Unlike the Proteus/1, the MPS has 32 different effects spread on two effects units. It features 200 presets on board and another 100 with an optional RAM card.

help me for the electr. diagram/circuit of the powersupply? Or other info? On the photo of the original powersupply is listed only: Out CT 18V AC 1,5 amp. But there are going three wires in the synths. Two to the on/of switch and one directly to the bottom of the print ...

### **power supply E-MU Proteus MPS - Vintage Synth Explorer Forums**

Hi E-MU'ers, I have a Proteus MPS Plus or MPS Plus Orchestral keyboard (9091), which was built by E-MU back in 1991 (until 1994 I guess). My questions (where I need help): The Firmware shows V1.22 at power-up. What is the latest firmware and are they EPROMs (I assume because of the age of this device) ?
