Miss Justine thinks learning should always be fun! After she takes a new teaching job at an Indian reservation, Miss Justine decides to use the beach as her outside classroom. Her students head to the beach with boxes to hold all their collected treasures, and they soon discover that math, history, and science can be exciting. After the students gather rocks, feathers, and shells, they return to the schoolhouse with Miss Justine where they begin discussing all their treasures. Sorting, adding, and counting shells becomes a math lesson. Recycling feathers, shells, and twigs becomes an art project. Feathers transform into dream catchers. Shells turn into beads. Then Miss Justine decides to use the feathers for something even more special—rewards for good work! Miss Justine and the Feathers shares the entertaining story of how a teacher brings new life to boring subjects as she uses simple ideas intertwined with American Indian traditions to show her students how everything is connected in their world.

Offers examples that illustrate descriptive writing and tips for brainstorming, writing the first draft, checking and refining, and sharing written work.

The bestselling landmark account of the first emergence of the Ebola virus. Now a mini-series drama starring Julianna Margulies, Topher Grace, Liam Cunningham, James D'Arcy, and Noah Emmerich on National Geographic. A highly infectious, deadly virus from the central African rain forest suddenly appears in the suburbs of Washington, D.C. There is no cure. In a few days 90 percent of its victims are dead. A secret military SWAT team of soldiers and scientists is mobilized to stop the outbreak of this exotic "hot" virus. The Hot Zone tells this dramatic story, giving a hair-raising account of the appearance of

rare and lethal viruses and their "crashes" into the human race. Shocking, frightening, and impossible to ignore, *The Hot Zone* proves that truth really is scarier than fiction.

Many macro and micro species, from terrestrial and aquatic environments, produce structurally unique compounds and, in many countries, still are the primary sources of medicines. In fact, secondary metabolites are an important source of chemotherapeutic agents but are also lead compounds for synthetic modification and the optimization of biological activity. Therefore, the exploitation of secondary metabolites, or their inspired synthetic compounds, offers excellent opportunities for the pharmaceutical industry. This Medicines Special Issue focuses on the great potential of secondary metabolites for therapeutic application. The Special Issue contains 16 articles reporting relevant experimental results, and an overview of bioactive secondary metabolites, their biological effects, and new methodologies that improve and accelerate the process of obtaining lead compounds with regard to new drug development. We would like to thank all 83 authors, from all over the world, for their valuable contributions to this Special Issue.

The job outlook for teachers range from good to excellent, reports the Bureau of Labor Statistics, with the highest growth areas in special education, English as a Second Language, science and math. A study guide for the Advanced Placement exam in human geography that provides subject reviews, two full-length practice tests, detailed answer explanations, a diagnostic test to identify strengths and weaknesses, and a CD-ROM with two additional practice tests.

This unique book closes the gap between psychology books and the research that made them possible. Its journey through the "headline history" of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider's look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior. For individuals with an interest in an introduction to psychology.

Explore the role the bicycle played in the women's liberation movement.
