Dance has the power to change the lives of young people. It is a force in shaping identity, affirming culture and exploring heritage in an increasingly borderless world. Creative and empowering pedagogies are driving curriculum development worldwide where the movement of peoples and cultures generates new challenges and possibilities for dance education in multiple contexts. In Dance Education around the World: Perspectives on Dance, Young People and Change, writers across the globe come together to reflect, comment on and share their expertise and experiences. The settings are drawn from a spectrum of countries with contributions from Europe, the Americas, the Middle East, Asia, the Pacific and Africa giving

insights and fresh perspectives into contrasting ideas, philosophies and approaches to dance education from Egypt to Ghana, Brazil to Finland, Jamaica to the Netherlands, the UK, USA, Australia, New Zealand and more. This volume offers chapters and narratives on: Curriculum developments worldwide Empowering communities through dance Embodiment and creativity in dance teaching Exploring and assessing learning in dance as artistic practice Imagined futures for dance education Reflection, evaluation, analysis and documentation are key to the evolving ecology of dance education and research involving individuals, communities and nations. Dance Education around the World: Perspectives on Dance, Young People and Change provides a great resource for dance educators, practitioners and researchers, and pushes for the furtherance of dance education around the world. Charlotte Svendler Nielsen is Assistant professor and head of educational studies at the Department of Nutrition, Exercise and Sports, research group Body, Learning and Identity, University of Copenhagen, Denmark. Stephanie Burrige lectures at Lasalle College of the Arts and Singapore Management University, and is the series editor for Routledge Celebrating Dance in Asia and the Pacific.

Our society leaves too many young people behind. More often than not, these are the most vulnerable young people, and it is through no fault of their own. Building a fair society and an equitable education system rests on bringing in and supporting them. By drawing together more than a decade of studies by the UK's Centre for Education and Youth, this book provides a new way of understanding the many ways young people in England are pushed to the margins of the education system, and in turn, society. Each contributor shares the personal stories of the young people they have encountered over the course of their fieldwork and

Bookmark File PDF Education And Young People S Services Kent

practice, combining this with accessible syntheses of previous studies, alongside extensive analysis of national datasets and key publications. By unpicking the many overlapping factors that contribute to different groups' vulnerability, the book demonstrates the need to understand each young person's life story and to respond quickly and collaboratively to the challenges they face. The chapters conclude with action points highlighting the steps individuals, institutions and policy makers can take to bring young people in from the margins. *Young People on the Margins* showcases first-hand examples of where these young people's needs are being addressed and trends bucked, drawing out what can and must be learned, for teachers, leaders, youth workers and policy makers.

This collection offers an inclusive, multifaceted look at individual students' patterns of writing trajectories, as well as their development of an identity as a writer. Building on rare longitudinal research, this translated text explores how adolescents learn subjects through writing and learn writing through subjects. Contributors consider issues relating to different forms of writing and grapple with students' ambivalence or resistance to this at school, together offering an examination of how the education system can rise to the challenge of offering today's students meaningful and appropriate writing instruction. Bringing knowledge from writing researchers and educational researchers together, *Understanding Young People's Writing Development* explores: Young adults' complicated experiences with the school writing project Practices, purposes, and identification in student note writing Knowledge construction in writing as experience and educational aim The pedagogical challenges and perspectives of writing and writer development Creativity as experience and potential in writing development The impact of

Bookmark File PDF Education And Young People S Services Kent

digital technologies and media on student writing Using students' work to aid the understanding of practice, this book will help highlight the importance of viewing individual writer developments from a social, institutional, and societal context, and raise questions that will advance writing pedagogy and the teaching and learning of school subjects.

"Physical Education for Young People with Disabilities explores a range of methods that Physical Education teachers can discover and engage with in order to ensure that their practice is more inclusive, no matter which age group they work with. Offering many practical ideas to include pupils with specific additional needs across a range of activity areas such as athletics, dance, gymnastics and swimming, this book will increase practitioner confidence, enabling them to feel equipped to meet individual needs and include all pupils in their lessons. The range of authors provides a wide perspective and wealth of experience and all the ideas have been trialled with students and young people, both nationally and internationally. Written by practitioners for practitioners, this book is a valuable resource for trainee teachers, in-service teachers, and practitioners working in a practical or sporting context with young people, and will support Physical Education lessons and physical activity sessions"--

Drawing on past research and new findings from a national investigation, the authors provide novel insight into the pressures pushing young people out of schools and the mechanisms at work in FLOs to re-engage them in education. The varied contributions of this book elucidate many of the measurable impacts of FLOs on the life trajectories of disenfranchised youth, including improved economic integration, mental and emotional wellbeing, and myriad other

outcomes.

This book explores contemporary issues in sexuality and relationship education for young people. Drawing upon rich empirical and ethnographic research undertaken with students and teachers in secondary schools, the author asks how school-based sexuality education can better equip young people to engage with contemporary social, political and cultural sexuality and relationships issues. Creatively working across both theoretical and practical contexts, this accessible work suggests approaches to sexuality and relationships education that can build upon the ways in which young people are developing a sense of identity; the ultimate aim being to help them to meet their emotional, spiritual and relational potential. Challenging established approaches to sexuality education, this thought-provoking book shines a new light on alternative perspectives that can help make sexuality and relationships education more relevant and meaningful for young people in a rapidly changing world. This volume will be of interest and value to students and scholars of sexuality and relationship education, as well as practitioners.

Are children natural philosophers? They are curious about questions such as the meaning and purpose of being alive and whether we can know anything at all. Pre-college philosophy takes as a starting point young people's inherent interest in large questions about the human condition. *Philosophy and Education: Introducing Philosophy to Young People* seeks to illuminate the ways in which philosophy can strengthen and deepen pre-college education. The book examines various issues involved in teaching philosophy to young people at different

grade levels, including assessing what teachers need in order to teach philosophy and describing several models for introducing philosophy into schools. Ways to explore specific branches of philosophy – ethics, epistemology, metaphysics, aesthetics, and logic – through literature, thought experiments, and games and activities, as well as traditional philosophy texts, are described. The book's final section considers student assessment and program evaluation, and analyzes the contributions pre-college philosophy can make to education in general. Teachers and educators – and parents – all want young people to grow up with the skills they need to pursue their own goals and become productive and successful adults. Thinking independently and reasoning clearly are central to these objectives. Philosophy helps students develop some of the analytic skills they need to engage in thoughtful decision-making throughout their lives, and the richness of the questions involved can help young people maintain their awareness of the world as marvelous and mysterious.

Marking the 40th anniversary of the Warnock Enquiry (1978) into special education in the UK and capturing the coverage of a public debate on special educational needs and disabilities (SEND) hosted by the University College London Institute of Education (2018), this volume explores the legacy of the Enquiry, considering how it has impacted on policy and practice relating to SEND and inclusion, and how it will continue to do so. Offering historical perspectives and drawing on professional and personal experiences, high-profile contributors, including practitioners, researchers, campaigners and parents, reflect on the approaches taken during the Warnock Enquiry and consider how successfully recommendations have been implemented. Reviewing conceptual and practical territory covered by the Warnock

committee, and assessing the current state of the inclusion and education of young people with SEND in the UK, the text sets out broad, evidence-based principles for rethinking inclusive practice and explores topics including: the purposes, contribution and impacts of the Warnock Enquiry rights-based approaches to the education of children with SEND past and present dialogue between mainstream and specialist settings challenges faced by parents of children with SEND implications of the Enquiry for initial teacher training perceptions of SEND in the media the relevance of the Enquiry to policy and practice in the years ahead. This invaluable text will widen current debates by exploring how persistent problems relating to inclusion and the education of children and young people with SEND might be resolved. It is an essential read for researchers, educationalists, practitioners and families involved in the education of children with SEND.

Migration and the Education of Young People 0–19 investigates migration from a number of perspectives to consider the changing dynamics of society within different countries. Examining the data associated with global migration by focusing on case studies from a wide range of countries, it provides detailed and balanced coverage of this politically sensitive topic to explore the educational needs of migrant young people, the impact of large-scale migration to and from countries and the policy challenges that individual countries face when ensuring adequate provision for migrant young people within their education systems. Chapters cover: The reasons why people might move Social and emotional learning in Britain: a tool to guard against cultural pollution? Migration into a global city: the economic and educational success of London Latvian people on the move and the impact on education People's movement –

This book explores the changing social dynamics through an extensive range of case studies and will be an essential resource for students taking undergraduate and postgraduate courses in education, sociology and international relations.

2020 American Indian Youth Literature Young Adult Honor Book 2020 Notable Social Studies Trade Books for Young People, selected by National Council for the Social Studies (NCSS) and the Children's Book Council 2019 Best-Of Lists: Best YA Nonfiction of 2019 (Kirkus Reviews) · Best Nonfiction of 2019 (School Library Journal) · Best Books for Teens (New York Public Library) · Best Informational Books for Older Readers (Chicago Public Library) Spanning more than 400 years, this classic bottom-up history examines the legacy of Indigenous peoples' resistance, resilience, and steadfast fight against imperialism. Going beyond the story of America as a country "discovered" by a few brave men in the "New World," Indigenous human rights advocate Roxanne Dunbar-Ortiz reveals the roles that settler colonialism and policies of American Indian genocide played in forming our national identity. The original academic text is fully adapted by renowned curriculum experts Debbie Reese and Jean Mendoza, for middle-grade and young adult readers to include discussion topics, archival images, original maps, recommendations for further reading, and other materials to encourage students, teachers, and general readers to think critically about their own place in history.
