Manhattan executive Corbin is haunted by memories of another time -- memories that do not belong to him. Then, in the midst of a raging New York City snowstorm, the inexplicable images become more vivid and real. And before he knows it, Jonathan Corbin has stepped into a bygone world of gaslit streets and horsedrawn carriages -- and into the center of a nineteenth-century maelstrom of love, revenge, obsession...and death. Through the swirling snow, he can make out the figure of a woman-someone he can't possibly recognize, but does; someone he knows he is destined to kill.

Book intended for children which explains death by presenting life as having a beginning and an end, with an appropriate 'Lifetime' in between. The length of this lifetime varies according to the type of living thing and is affected by illness and injury. The illustrator was awarded the Hans Christian Andersen Medal in 1986.

Music Outside the Lines is an informative and practical resource for all who are invested in making music composition an integral part of curriculum. Author Maud Hickey offers both a well-grounded justification for teaching music composition and also a compendium of useful instructional ideas and classroom activities. Hickey begins with a rationale for teachers to begin composition activities in their own classrooms, with a thoughtful argument that demonstrates that all music teachers possess the skills and training needed to take children along the path toward composing satisfying musical compositions even if they themselves have never taken formal composition lessons. She also addresses some of the stickier issues that affect teaching music composition in schools such as assessment, notation, and technology. Most importantly, she introduces a curricular model for teaching composition, a model which provides an array of composition activities to try in both the music classrooms and studio. These activities encourage musical and creative growth through music composition, while they are organized in logical units corresponding to well-known teaching modules, they also offer jumping off points for music teachers to exercise their own creative thinking and create music composition activities that are customized to their classes and needs. As a whole, **Music Outside the Lines** both successfully reasons that music composition should be at the core of school music curriculum and also provides inservice and preservice educators with an essential resource and compendium of practical tips and plans for fulfilling this goal.

Exemplars presents a collection of remarkable student writing samples along with powerful strategies for using them to establish standards and to generate more effective classroom writing! These activities involve students in evaluating writing samples and then applying what they have learned to their own work. Organized around the six key traits of good writing|content, organization, sentence variety, word choice, voice, and language conventions|this resource for both new and experienced teachers demonstrates how to collect and present student writing samples to engage young writers and model effective skills.

With growing academic responsibilities, family commitments, and inboxes, scholars are struggling to fulfill their writing goals. A finished book|or even steady journal articles|may seem like an impossible dream. But, as Joli Jensen proves, it really is possible to write happily and productively in academe. Jensen begins by busting the myth that universities are supportive writing environments. She points out that academia, an arena dedicated to scholarship, offers pressures that actually prevent scholarly writing. She shows how to acknowledge these less-than-ideal conditions, and how to keep these circumstances from draining writing time and energy. Jensen introduces tools and techniques that encourage frequent, low-stress writing. She points out common ways writers stall and offers workarounds that maintain productivity. Her focus is not on content, but on how to overcome whatever stands in the way of academic writing. Write No Matter What draws on popular and scholarly insights into the writing process and stems from Jensen's experience designing and directing a faculty writing program. With more than three decades as an academic writer, Jensen knows what really helps and hinders the scholarly writing process for scholars in the humanities, social sciences,and sciences. Cut down the academic sword of Damocles, Jensen advises. Learn how to write often and effectively, without pressure or shame. With her encouragement, writers of all levels will find ways to create the writing support they need and deserve.

This book focuses on the most common areas for improvement in teaching, learning and assessment that are regularly identified in lesson observations, including beginning and ending lessons, differentiation, assessment for learning, giving feedback and effective questioning. Many of the observations about these key topics are not fully understood by teachers, who remain unclear about what can they can do to improve. Specifically written for use within vocational contexts, Sharrock helps you to fully understand these common areas for improvement, unpicks what good and poor practice might look like, and provides practical activities and strategies for you to use and adapt in your teaching. It therefore addresses the strong government drive to improve standards and the need to help FE colleges and other post-16 providers achieve this aim.
