Learning in the workplace has come of age with the publication of this book. It shows the way for a new level of sophistication in the ways learning and work are treated. And it opens new territory

Access Free Effective Training Systems

for exploration in the world of learning throughout life. David Boud, University of Technology, Sydney Stephen Billett provides a comprehensive and practical model, well-grounded in theory and research, to guide learning in the workplace. This is a 'must

Access Free Effective Training Systems

read' for those in vocational education and training. Victoria Marsick, Columbia University Learning does not stop when you leave school or tertiary studies, but continues throughout life. The workplace is now seen as an important learning environment,

Access Free Effective Training Systems

and businesses and government units are encouraged to become 'learning organisations'. This is all very well in theory, but how does learning actually occur in the workplace? Drawing on research of a wide variety of workplaces in different countries, Stephen Billett

Access Free Effective Training Systems

analyses the strengths and limitations of 'on-the-job' learning. He outlines what knowledge individuals need and how they can best acquire this knowledge in workplace settings. He shows how to develop a workplace curriculum, and how it can be implemented in

Access Free Effective Training Systems

organisations of different sizes.

Learning in the Workplace offers a comprehensive pedagogy for the workplace. It is a valuable reference for human resource practitioners and students in courses on professional development and adult and

Access Free Effective Training Systems

vocational learning.

Blanchard

Discusses the best methods of learning, describing how rereading and rote repetition are counterproductive and how such techniques as self-testing, spaced retrieval, and finding additional

Access Free Effective Training Systems

layers of information in new
material can enhance learning.
