ELECTRIC ARC FURNACE AC (PART 1) Layout & Components

An electric arc furnace is a furnace that heats charged material by means of an electric arc. Industrial arc furnaces range in size from small units of approximately one ton capacity up to about 400 ton units used for secondary steelmaking. Arc furnaces used in research laboratories and by dentists may have a capacity of only a few dozen grams. Industrial electric arc furnace temperatures can reach 1,800 °C, while laboratory units can exceed 3,000 °C. Arc furnaces differ from induction ...
