#40 Endocrine System Study Guides

Communication from the brain is sent

to the rest of the body by the

endocrine system as well as by the

nervous system. The endocrine

system is a series of glands

throughout the body that secrete

chemicals (hormones) into the

bloodstream; hormones, in turn, affect

body functions. The endocrine glands,

their locations, and their major

functions are given in Table 1.

The human endocrine system

Where To Download Endocrine System Study

Endocrine System modulates several processes of the body by the function of hormones. The endocrine system secretes hormones that control how bodily functions work. Thus, the human endocrine system watches over and coordinates all the systems of the body with the use of hormones.

Human Endocrine System

Use this simple Q& A page over the endocrine system to test your knowledge and prepare for upcoming tests. Feel free to print, copy, share, and use this study guide in any way!
Remember: Adrenal HYPO function = Addison's; Adrenal HYPER function=Cushing's; Thyroid HYPER function=Graves. The biggest tip I can give with learning endocrine D/Os is to focus on the pituitary hormones.
