Suggested in this paper are a set of processes which augment—and do not replace—traditional systems engineering. As a complex system, the AOC evolves. Drawn from principles of complex adaptive systems, the augmentations to traditional systems engineering, known as Complex Systems Engineering, seeks to mimic the forces which drive evolution and guide the results.

Introduction The complexity we are seeing in the enterprises and systems that MITRE helps engineer requires a spectrum of systems engineering techniques. When a system is bounded with relatively static, well-understood requirements, the classical methods of systems engineering are applicable and powerful.
