The material of choice of a given era is often a defining point. Phrases such as Stone Age, Bronze Age, Iron Age, and Steel Age are historic, if arbitrary examples. Originally deriving from the manufacture of ceramics and its putative derivative metallurgy, materials science is one of the oldest forms of engineering and applied science. Modern materials science evolved directly from metallurgy ...

Materials Engineering Technology - NAIT

Materials engineering is involved with the properties of matter and the application of those processes to science and engineering. During its early years, materials engineering was concerned with metal alloys, ceramics, polymers and exotic materials. In recent years, materials engineering has been involved with nanoscience and nanotechnology.
