This handbook of English Renaissance literature serves as a reference for both students and scholars, introducing recent debates and developments in early modern studies. Using new theoretical perspectives and methodological tools, the volume offers exemplary close readings of canonical and less well-known texts from all significant genres between c. 1480 and 1660. Its systematic chapters address questions about editing Renaissance texts, the role of translation, theatre and drama, life-writing, science, travel and migration, and women as writers, readers and patrons. The book will be of particular interest to those wishing to expand their knowledge of the early modern period beyond Shakespeare.

Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century, this companion provides scholars with a comprehensive, authoritative and up-to-date foundation for research in this field. In intellectual, material and social terms, the transformation undergone by Western culture over the period was unprecedented. Many of these changes were grounded in the growth of science. Yet science was not a cultural monolith then any more than it is now, and its development was shaped by competing world views. To cover the full range of literary engagements with science in the nineteenth century, this companion consists of twenty-seven chapters by experts in the field, which explore crucial social and intellectual contexts for the interactions between literature and science, how science affected different genres of writing, and the importance of individual scientific disciplines and concepts within literary culture. Each chapter has its own extensive bibliography. The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth-century science Bernard Lightman.

A new critical assessment of the works of the Austrian-Jewish author, in whom there has been a recent resurgence of interest, from the

perspective of world literature.

Can the criticism of literature and culture ever be completely professionalized? Does criticism retain an amateur impulse even after it evolves into a highly specialized discipline enshrined in the university? *The Critic as Amateur* brings leading and emerging scholars together to explore the role of amateurism in literary studies. While untrained reading has always been central to arenas beyond the academy — book clubs, libraries, used bookstores — its role in the making of professional criticism is often disavowed or dismissed. This volume, the first on the critic as amateur, restores the links between expertise, autodidactic learning and hobbyist pleasure by weaving literary criticism in and out of the university. Our contributors take criticism to the airwaves, through the culture of early cinema, the small press, the undergraduate classroom and extracurricular writing groups. Canonical critics are considered alongside feminist publishers and queer intellectuals. *The Critic as Amateur* is a vital book for readers invested in the disciplinary history of literary studies and the public role of the humanities. It is also a crucial resource for anyone interested in how literary criticism becomes a richly diverse yet shared discourse in the 20th and 21st centuries.
