SUSTAINING THE EARTH by Tyler Miller is everything you have come to expect and more. Two new chapters on basic ecology (Chapters 3 and 4) have been added to this edition to enhance this science-based book.

This text differs from Miller's comprehensive text, *LIVING IN THE ENVIRONMENT*, 13th Edition, because there is much less detail and more integration of topics, with a different chapter order. For example, the following topics have been integrated into single chapters: human population dynamics

Download File PDF

and urban problems are in Chapter 5, nonrenewable and renewable energy resources are in Chapter 6, terrestrial and aquatic biodiversity are in Chapter 7, water resources and water pollution are in Chapter 12, solid and hazardous waste are in Chapter 13, and environmental economics, politics, and

worldviews are in
Chapter 14. For the first
time ever in a Miller
textbook, students will
receive a CD-ROM,
entitled Interactive
Concepts in
Environmental Science.
This groundbreaking
addition integrates
nearly 100 engaging
animations and
interactions with chapter
summaries, flashcards,

and Web-based quizzes.

Organized by chapter, students will find links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves. Miller has remained true to his hallmark features, such as high quality end-of-chapter questions, an orientation toward

prevention rather than clean-up, an integration of Web resources and video, and a balanced presentation of controversial environmental issues.
