This book provides an introductory theoretical foundation of the ethics embedded in Islamic economics and finance, and it shows how this ethical framework could pave the way to economic and social justice. It demonstrates how Islamic finance—a risk-sharing and asset-backed finance—has embedded universal values, ethical rules, and virtues, and how these qualities may be applied to a supposedly value-neutral social science to influence policy-making. This book argues that ethical and responsible finance, such as Islamic finance, could lead the efforts to achieve sustainable economic development. Iqbal and Mirakhor then conduct a comparative analysis of Islamic and conventional financial systems and present Islamic finance as an alternative that can address today's growing problems of inequality, social injustice, financial repression, unethical leadership, and lack of opportunity to share prosperity.

The Handbook of Research on Islamic Business Ethics is an essential source for policymakers and researchers to gain an understanding of pressing ethical issues in the Islamic business world. The primary objective is to provide readers with an insight into the ethical principles that govern Islamic business conduct. These principles are articulated with a view to evaluating whether business actors uphold their social responsibilities and are committed to ethical values in their conduct. Exploring the interweaving relationship between Islamic business ethics and the market, this Handbook examines the critical role that ethics can play in ensuring that business thrives. It offers theoretical perspectives on research and goes beyond the conventional treatment of Islamic ethics. It debates important market issues and asserts that social actors in the Islamic business world should be cognisant of these issues so as to behave in a moral and responsible manner. Implications for researchers and for market conduct are illuminated. Readers wanting to familiarize themselves with day-to-day Islamic business ethics will find this Handbook an invaluable guide.

Since the financial crisis of 2007/2008, a renewed discussion on the ethics and finance is being examined from different dimensions – finance for good society, responsible finance, ethical finance, financial crimes, and financial repression. The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance. The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe. Handbook attempts to find answers to some questions concerning the definition and characteristics of the ethical system in Islam. What is its goal and how do its rules and practices ensure welfare for individuals and society? Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology? Is the present generation accountable for the welfare of future generations? Where is the boundary between law and ethics and who guarantees their adoption and implementation?

Islamic Business Finance is based on strong ethical regulations as suggested by Islamic Literature, such as the Quran and the Traditions of the Prophet of Islam, and could be considered as a subclass of the wider subject of ethical standards in business. This book highlights the basic principles of Islamic Business ethics and their implication in today's global business environment. It highlights the most important features of Islamic banking and finance in relation to the core principles of Shariah law. It is the most comprehensive book to date, in terms of the number of Quranic verses and traditions of the Prophet relating to this subject, which are interspersed throughout the text. It

explains how ethics are defined both in general terms and within the context of an Islamic perspective. In addition, it provides a logical interpretation of Islamic principles of business ethics, while keeping in view the through the use of contemporary business practices. Topics such as digital currencies, money laundering, etc. are discussed at length. This book also discusses the new and emerging ethical issues faced by business and industry globally. This book will be a valuable reference guide for students, teachers and researchers of Islamic banking and finance.

The theme of circular causation has nascent origin in the field of sociology of economics with vast development applications and with epistemological issues on modeling in the framework of the phenomenon of pervasive interconnectedness. Thus the sociological theme of epistemic unity of knowledge grounds the theory and application of the theory and models of circular causation to the vast realm of socioeconomic development issues. The theory and application of circular causation has methodological similarities with Gunnar Myrdal's theory of social causation and Joseph Schumpeter's and Hayek's learning models of evolutionary phenomena. One can re-engineer many important works by sociological economists in and by the methodology of circular causation. Among these other important works are capabilities and functioning by Amartya Sen; John Rawls' evolutionary good society aspiring for social justice; adaptation of Ilya Prigogine's theory of being and becoming to social, economic and development phenomenon; and George Soros' theory of reflexivity in history and financial markets. The proponent of this book has pioneered the area of theory and application of circular causation extensively.
