Focusing on state formation and the identity-geopolitics relationship, makes the case that the Balkans were at the forefront of European history in the century before World War I

Combining comment with research abounding in historical and cultural detail, this book tells how from the 16th to the 20th century The Balkans have been perceived by west European travellers, many of whom have seen it as part of Asia and sought accordingly to inform their contemporaries of its exotic, outlandish and primitive ways.

This is a companion volume to Ethnicity and Nationalism in Russia, the CIS and the Baltic States. It brings together scholars from the UK, Poland, Slovakia, Belgium, Greece Bulgaria and the USA to examine the legacy left by decades of communist rule and to assess the importance of the revival of ethnicity and nationalism for the fate of the new democracies of Central and Eastern Europe and of the Balkans as they approach the millennium. A wide range of viewpoints are presented on the key issues of national identity, state formation, nationalist ideology and the issue of territorial and ethnic identity. Different theories are outlined and differences and similarities in the process of nation building discussed. The latest research findings are presented and Western readers are offered insights via a series of comprehensive studies of the Czech Republic, Slovakia, Hungary, Slovenia, Macedonia, Bosnia-Herzegovina, Romania, Croatia and Albania. As with its companion volume, this book demonstrates the difficulties of creating modern nation states in war-torn ex-Yugoslavia or in the post-communist countries of East-Central Europe.

Examining two centuries of Balkan politics, from the emergence of nationalism to the retreat of Communist power in 1989, this is the first book to systematically argue that many of the region's problems are external in origin. A decade of instability in the Balkan states of southeast Europe has given the region one of the worst images in world politics. The Balkans has become synonymous with chaos and extremism. Balkanization, meaning conflict arising from the fragmentation of political power, is a condition feared across the globe. This new text assesses the key issues of Balkan politics, showing how the development of exclusive nationalism has prevented the region ' s human and material resources from being harnessed in a constructive way. It argues that the proximity of the Balkans to the great powers is the main reason for instability and decline. Britain, Russia, Austria-Hungary, France and finally the USA had conflicting ambitions and interests in the region. Russia had imperial designs before and after the 1917 Revolution. The Western powers sometimes tolerated these or encouraged undemocratic local forces to exercise control in order to block further Soviet expansion. Leading authority Tom Gallagher examines the origins of these Western prejudices towards the Balkans, tracing the damaging effects of policies based on Western lethargy and cynicism, and reassesses the negative image of the region, its citizens, their leadership skills and their potential to overcome crucial problems.

An analytical comparison of the democratization process in 12 countries of East Central Europe and the Balkans. It characterises types of democratization which have occurred there from 1989 to 1997, setting these recent changes in the context of the political history of the countries.

This book shows how current and future research on the social history of the Balkans can be integrated into a broader European framework. The contributions look at a range of methodological and empirical issues, and the theme that links the various studies is that of the contrasting, yet, at the same time, entangled ideas of the Balkans as a "mental map" and of Southeast Europe as an "historical region." (Series: Studies on South East Europe - Vol. 10)

The history of the Balkans has been a distillation of the great and terrible themes of 20th century history-the rise of nationalism, communism, fascism, genocide, identity and war. Written by one of the leading historians of the region, this is a new interpretation of that history, focusing on the uses and legacies of nationalism in the Balkan region. In particular, Professor Veremis analyses the influence of the West-from the fall of the Ottoman Empire and the rise and collapse of Yugoslavia. Throughout the state-building process of Greece, Serbia, Rumania, Bulgaria and later, Albania, the West provided legal, administrative and political prototypes to areas bedevilled by competing irredentist claims. At a time when Slovenia, Rumania, Bulgaria and Croatia have become full members of the EU, yet some orphans of the Communist past are facing domestic difficulties, A Modern History of the Balkans seeks to provide an important historical context to the current problems of nationalism and identity in the Balkans.

The major emphasis of Volume 1 is on the movements for national sovereignty, the revolutionary activity associated with them, and the place of these events in the international relations of the day for the major nationalities of the Balkan region. Volume 2 deals primarily with events in the 20th century. A large portion of this volume is devoted to wartime experiences, the establishment of postwar regimes, and their internal development to 1980.
