Advance your knowledge of Excel in this second of two self-paced online Excel classes. Learn how to use complex data sets and workbooks, and sort and filter through your Excel data in this online class. As your data sets grow and become complicated, you will save time and frustration by leveraging the tools and automation practices within Excel. Organize your data through sort, hide data that's not relevant in the filters, and format cells to make your information easier to review.

In Part 1 of this blog series we talked about how Power Pivot in Excel introduced a much anticipated enhancement for the strong Excel user. For the first time we learned to access, clean, and work with larger datasets all within the familiar environment of Excel. Two years later (2015), this same technology would migrate into a brand new analytical tool called Power BI.
