with a view to filling a perceived gap in the consultancy market.

SRK News #47 | SRK Consulting
SRK has applied state-of-the-art 3D targeting to identify new exploration targets in the area. 3D targeting is a new technique that uses all available geological information to build a 3D block model of the site of interest. The model is interrogated and the most prospective volumes identified.

formed as a subsidiary company of SRK Consulting UK, SRK ES achieved full SRK Consulting Practice status in 2008.

Exploration Geology - SRK Consulting

SRK remains at the forefront of providing high-quality support to exploration companies active in both brownfields and greenfields exploration. Search for deep or buried deposits relies on exploration targeting from geophysical datasets or specialised geochemical datasets by applying quality structural geology to geological interpretation of them.
