Launch Gizmo. Select sample cells from a plant or animal and place the cells on a microscope to look inside the cells. Information about their common structures is provided (and the structures are highlighted), but you will need to move your microscope slide to find all the different structures. Launch Gizmo.

Cell Structure Gizmo - Lesson Info - Explore Learning

The organelles in a cell work together to produce energy, manufacture proteins, and store genetic code. In the Cell Structure Gizmo, students learn the names and functions of cell organelles, identify organelles on a diagram of an animal or a plant cell and explain how plant cells are different from animal cells. After completing the Gizmo, teachers can ask students to discuss the following questions: Which organelle functions like a city government?

Student Exploration Gizmo Cell Structure Answers | hsm1 ...

New Gizmo: Cell Types. by Laura Gallagher May 3, 2017. In 1665, Robert Hooke observed thin slices of cork through a primitive microscope. The cork slices were divided into thousands of tiny boxes, which Hooke named 'cells' because they reminded him of monk's cells in a monastery. Over 150 years later, Matthias Schleiden and Theodor Schwann codified years of observations into the cell theory: all living organisms are composed of cells, the cell is the basic unit of structure and ...
