Use the motor to check for 36 volts on both sides of the solenoid. If the voltage is lower or there is no power, there could be a wiring and/or connection issue. Trace the wiring to look for damaged wires and loose or corroded connections. If there is power at the solenoid, then it is bad and will need to be replaced.

~~E-Z-GO Golf Cart Troubleshooting Questions Answered~~

This is the troubleshooting I did for my neighbors golf cart to try to get working again.

~~EZ GO ELECTRIC GOLF CART PROBLEMS - WILL NOT GO - YouTube~~

By Steve Smith The E-Z-GO golf cart has two kinds of speed controllers, the Precision Drive System (PDS) and the Drive Control System (models before 1994). If your cart is having problems running at a constant speed or is performing erratically, then you should troubleshoot the controller to find out what the problem is.

~~Troubleshooting the Speed Controller on an E-Z-GO Golf Cart~~

How to Troubleshoot an Electric Golf Cart Step 1. Test the wall socket where you charge your cart. Every golf cart has a built-in charger that connects to a wall... Step 2. Expose your golf cart batteries. If you are getting power to the charger, it's time to check the batteries. Step 3. Test the ...
