Separate documents show that those who took the OCR exam board's A-level maths qualification will walk away with an A if they achieved 54% across all papers – a total of 161 out of 300.

Written by a senior examiner, Richard Fosbery, this OCR AS Psychology Student Unit Guide is the essential study companion for Unit F211: Cells, Exchange and Transport. This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index examiner's advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade

Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements, summarises the relevant unit content and includes a series of specimen questions and answers. There are three sections to each guide: Introduction - includes advice on how to use the guide, an explanation of the skills being tested by the assessment objectives, an outline of the unit or module and, depending on the unit, suggestions for how to revise effectively and prepare for the examination questions. Content Guidance - provides an examiner's overview of the module's key terms and concepts and identifies opportunities to exhibit the skills required by the unit. It is designed to help students to structure their revision and make them aware of the concepts they need to understand the exam and how they might analyse and evaluate topics. Question and Answers - sample questions and with graded answers which have been carefully written to reflect the style of the unit. All responses are accompanied by commentaries which highlight their respective strengths and weaknesses, giving students an insight into the mind of the examiner.

Written by a senior examiner, Richard Fosbery, this OCR AS/A2 Biology Student Unit Guide is the essential study companion for Units F213 and F216: Practical Skills in Biology. This full-colour book includes all you need to know to prepare for your Unit F213 and Unit F216 assessments: clear guidance on the range of practical apparatus and techniques that you need to know about and an overview of the scientific method of testing ideas by experimentation examiner's advice throughout, so you will know what to expect in the assessments and will be able to demonstrate the skills required sample investigation tasks for extra practice before your assessments

Written by a senior examiner, Richard Fosbery, this OCR A2 Psychology Student Unit Guide is the essential study companion for Unit F214: Communication, Homeostasis and Energy. This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index examiner's advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade

Written by curriculum and specification experts, this Student Book supports and extends students through the new linear course while delivering the breadth, depth, and skills needed to succeed in the new A Levels and beyond. It develops real subject knowledge as well as essential exam skills.

A new resource for the 2008 OCR specification providing supportive features and increased flexibility in teaching OCR A Level Science. The trusted choice for the 2008 OCR Specification. Biology 1 clearly explains concepts and is supported by a CD-ROM in the back of the books that provides extra information and links to a free website full of e-learning activities. The book comes with an interactive PDF CD-ROM that provides extra information for rapid advancement for pupils requiring it, without creating a heavy and intimidating book. The CD-ROM links to a free website full of e-learning activities, promoting independent and extension learning.

Anyone who has suffered knows that there is no such thing as "getting a grip on oneself" or "pulling oneself up by the bootstraps. The only bootstrap in the Christian life is the Cross," says Mason. "Sometimes laying hold of the cross can be comforting, but other times it is like picking up a snake." Job knew this firsthand. From him we learn that there are no easy answers to suffering. That the mark of true faith is not happiness, but rather, having one's deepest passions be engaged by the enormity of God. And through Job we learn the secret of the gospel: that "mercy is the permission to be human." The Lord never gave Job an explanation for all he had been through. His only answer was Himself. But as Job discovered, that was enough. The Gospel According to Job sensitively brings the reader to this realization, using a devotional commentary format that reminds them that it's all right to doubt, to be confused, to wonder—in short, to be completely human. But what will heal us and help us endure is a direct, transforming encounter with the living God.
