Hamon fabric filter systems are a major component of a long tradition of excellence. We combine more than 40 years of experience in fabric filtration including the latest approaches in low pressure high volume pulse jet filters as well as more conventional technologies such as medium pressure pulse jet filtration. Our engineers have designed and constructed fabric filters for a variety of ...

Fabric filters - Hamon

Solutions to clear the air The DuoClean™ fabric filter possesses powerful emission-reduction capabilities in medium to large gas flows, reducing CAPEX through an octagonal-shaped compact filter design. Two types of DuoClean bag filters are available: the DuoClean DC2 for large gas flows and DuoClean DC8, suitable for medium gas flows.

The latest innovations in fabric filter technology

Large fuel flexibility and ability to handle varying boiler loads. GE offers both high ratio (pulse jet) and low ratio (reverse air) options, depending on the application. Fabric filters may be used stand-alone or integrated in Dry Flue Gas Desulfurization (DFGD) solutions (NID* or SDA), for dry scrubbing in the aluminum industry (Abart*), or as the principal and polishing filters in mercury control solutions (Mer-Cure* or Filsorption*).

Fabric Filter Solutions For Large Coal Fired Power Plants

DRM Filtration are a leading filter bag manufacturer that also offers custom-made industrial filter bags as well as a full range of replacement filters that deliver both standard and non-standard requirements. Our filtration and technical fabric range is extensive, well-researched and tested, providing our customers with a selection of fabrics with different material, pore sizes and permeability to match their filtration needs.

Filter Bags, Filter Socks, Filter Sleeves | DRM Filtration

The electrostatic precipitator is suitable for collecting large particulate matter, and the fabric filter is suitable for collecting fine particles. In the ESP-FF, most of the fly ash in the flue gas is collected in the electric field, and then the remaining fine particulate matter is collected by the fabric filter.

Fabric Filter Services

This is an example of application to exhaust gas processing from a pulverized coal-fired boiler. We reduced the size of the fabric filter by increasing the filter bag length to 9 m (normal length is 6.0 m or 6.9 m). Using a long filter bag for a large quantity of process gas made it possible to reduce the size of the device.

Bag house and Fabric Filter Plant. Our fabric filter plant is suitable for application requirements where emissions below 10mg/m3 are required. Howden pioneered the use of fabric filters at South Africa power stations in 1986, and today provides world class solutions that are in step with the latest environmental regulations. We designed and installed the largest power station fabric filter plant of its type in the world for the 4,110MW Majuba Power Station.

In the Automotive range of products, filters are made that protect relevant mechanical and electronic components. Sefar produces high-precision screens made of monofilament fabric for safety filters to protect valves, pumps and sensors. Depth filtration media is required when high dirt pick-up is required; an example is the Fuel/AdBlue filter.

SEFAR - Filtration – Filter Components

The wastewater then flows through the filter fabric from the inside to the outside of the drum. Solids that are too large to pass through the filter fabric are removed from the fabric by a mechanism at the highest part of the rotating drum. These collected solids flow via a trough to a collection tank.

materials used. Fabric filters using 16 oz/yd2 woven fiberglass bags were found to be less effi-cient in particulate matter collection than fabric filters using 22 oz/yd2 bags. Fabric filters using22oz/yd2 bags achieved particulate emission levels consistently less than 0.02 lb/ MMBtu (Belba 1992). Table 7-3. Pulse-jet fabric filter performance data Site No.
