Did you know 64% of Gen Zers and millennials feel better understood by the specialized online communities than by their family and real-world friends? Today, more people seek connection online,

along the way" (Publishers Weekly). Carl Schramm, the man described by The Economist as "The Evangelist of Entrepreneurship," has written a myth-busting guide packed with tools and techniques to help you get your big idea off the

ground. Schramm believes that entrepreneurship has been misrepresented by the media, business books, university programs, and MBA courses. For example, despite the emphasis on the business plan in most business

schools, some of the most successful companies in history—Apple, Microsoft, Google, Facebook, and hundreds of others—achieved success before they ever had a business plan. Burn the Business Plan punctures the myth

File Type PDF Fbla Entrepreneurship Study Guide

of the cool, tech-savvy twenty-something entrepreneur with nothing to lose and venture capital to burn. In fact most people who start businesses are juggling careers and mortgages just like you. The average entrepreneur is

actually thirty-nine years old, and the success rate of entrepreneurs over forty is five times higher than that of those under age thirty.

Entrepreneurs who come out of the corporate world often have discovered a need for a product or

service and have valuable contacts to help them get started. Filled with stories of successful entrepreneurs who drew on real-life experience rather than academic coursework, *Burn the Business Plan* is the guide to starting and
