While many texts characterize themselves as having either a “user” approach or a “preparer” approach, Williams’ Financial Accounting is written for faculty who want to strike a balance between these approaches. Business majors will find relevance in the “Ethics, Fraud & Corporate Governance,” “Your Turn” and “Case in Point” boxes throughout the chapters while accounting majors will receive a firm grounding in accounting basics that will prepare them for their intermediate course.

With the sixteenth edition of Financial and Managerial Accounting: The Basis for Business Decisions, the Williams author team continues to be a solid foundation for students who are learning basic accounting concepts. In this revision, the authors have added to and refined the coverage of International Financial Reporting Standards (IFRS), particularly in Chapter 15 (“Global Business and Accounting”). Hallmarks of the text—including the solid Accounting Cycle Presentation, relevant pedagogy, and high quality, end-of-chapter material—have been updated throughout the book.

"As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm grasp of concepts like the accounting cycle and managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for future success in business. However, through new coverage of International Financial Reporting Standards and a revised
