It is no surprise that Christians have long been involved in education - the quest for human flourishing and wholeness is at the heart of the gospel, and education is critical to that quest. Good education has the power to transform our relationships with ourselves, with each other, with and within communities and ultimately between nation states. But what is surprising is our theological silence in the face of the deep injustices which lie at the heart of our education system. In *Inequality and Flourishing*, Mariama Ifode-Blease explores and exposes these inequalities, and calls for a greater remembrance of the bountiful and daunting gift of stewardship we have as we educate young people. Drawing on interviews, she offers a fresh vision of education as being about giving children the best tools to be stewards of their minds and bodies, our communities and ultimately our planet.

First Published in 1999. This is a collection of essays looking at the continuing growth and significance of Sports Law. Among the tokens of the flourishing of sports law during the past two decades are the publication of specialized treatises, articles on facets of sports law in traditional law reviews, appearance of legal journals or reviews devoted solely to sports law, and courses on the subject in law schools. Sports and the Law: Major Legal Cases should attract the interest of a variety of audiences. Authorities in the field of sports law will want to examine how their colleagues as well as non- specialists treat specific cases and broader issues. Also, lawyers who lack familiarity with sports law may desire an introductory exposure to the rapidly expanding field. Each essay ends with a selected bibliography.

A ‘ coach ’ is more than just somebody who leads in the organisation and delivery of structured sport. The role of a coach goes beyond leadership, requiring an understanding of theories of teaching and learning. To become a coach you must know how people learn. Becoming a Sports Coach aims to introduce the multi-dimensional and inter-locking knowledge bases that any aspiring coach will need to develop, and that any established coach needs to master in order to improve their professional practice. While traditional coach education pathways have focused on what to coach, this book argues that understanding how knowledge can be communicated to learners is just as important. Asking why we coach, through critical reflection and self-

knowledge, is also an essential part of the process of becoming a sports coach. The book explores three types of knowledge – content knowledge, pedagogic knowledge and self-knowledge – challenging the reader to reflect on their own coaching experiences and to develop a personal philosophy of coaching. It explores key pedagogic themes in contemporary coaching studies, such as humanistic coaching, inclusive practice, coaching for understanding, and the athlete-coach relationship. Real case studies are used to illuminate the ways – transferrable across sports - in which coaches can apply theory to practice and ultimately enhance their work. With contributions from leading coaching researchers and practitioners, combining practical guidance with important theoretical insights, this book will help any coaching student or developing professional to better understand the journey to becoming an effective sports coach.

Skillful Striving is a multi-methodological and cross-cultural examination of how we flourish holistically through performative endeavors, e.g., sports, martial and performing arts. Relying primarily on sport philosophy, value theory, phenomenology, philosophy of mind, pragmatism, and East Asian philosophies (Japanese and Chinese), it espouses thick holism. Concerned with an integrative bodymind gradually achieved through performance that aims at excellence, the process of self-cultivation proper of thick holism relies on an ecologically rich epistemic landscape where skills are coupled to virtues in pragmatic contexts. Ultimately, this process results in admirable performances and exemplary character. Japanese d (practices of self-cultivation) are prominent modes and

models of such flourishing. A holistic and radically enactive approach that advances contentless capacities in lieu of representations transparently accounts for the kind of action that characterizes such expert performances. Importantly, these performer-centered endeavors unfold within communities that foster the cultivation of our abilities as lifelong quests for human excellence. Each chapter can be read independently but still forms part of a continuous argumentative and narrative thread. This book was previously published as a special issue of *Sport, Ethics and Philosophy*.

Brings together the key writings from the flourishing field of sport management to meet the need for an authoritative reference and research resource to catalogue and describe the various approaches to the study of the subject that have developed over the last several decades.
