Okay, here's the story. There is a recall kit for several years of F-250 trucks (including 93) which consists of two in-line check valves and a new fuel pressure regulator. The valves go in the supply line from the fuel pumps to the tanks and prevent fuel from flowing into the tanks from the supply lines. This kit was issued by Ford to prevent two problems: fuel flowing from one tank into the other through the supply lines, and long cranking times due to fuel running back into the tanks ...

~~Ford F250 Dual Fuel Tank Problem - MisterFixit~~

The original gas tank on a 1998 F-250 Lariat has a capacity of 30 gallons. Because there is no mention of dual fuel tank capacity available, the 2nd fuel tank was likely added after purchase. You would need to know the capacity of the fuel tank when it was installed. -----Lexia-3
