A complete guide to insurance billing and coding, Insurance Handbook for the Medical Office, 13th Edition covers all the plans that are most commonly encountered in clinics and physicians' offices. Its emphasis on the role of the medical insurance specialist includes areas such as diagnostic coding, procedural coding, Medicare, HIPAA, and bill collection strategies. Learning to fill in the claim form accurately is made easier by the use of icons for different types of payers, lists of key abbreviations, and numerous practice exercises. This edition provides the latest on hot topics such as ICD-10, healthcare reform, the new CMS-1500 form, and electronic claims. Trusted for more than 30 years, this proven reference from Marilyn Fordney prepares you to succeed as a medical insurance professional in any outpatient setting. Emphasis on the business of running a medical office highlights the importance of the medical insurance specialist in filing clean claims, solving problems, and collecting overdue payments. Key terms and key abbreviations are defined and emphasized, reinforcing your understanding of new concepts and terminology. Detailed tables, boxes, and illustrations call out key points and main ideas. Unique! Color-coded icons clarify information, rules, and regulations for different payers. An Evolve companion website enhances learning with performance checklists, self-assessment quizzes, and the Student Software Challenge featuring cases for different payer types and an interactive CMS-1500 form to fill in. A workbook contains learning tips, practice exercises for key terms and abbreviations, review questions, study outlines, performance objectives, a chapter with practice tests, and critical thinking activities for hands-on experience with real-world cases. Available separately. Updated coverage of key health insurance topics includes HIPAA compliance, the HITECH Act, health reform of 2010, electronic health records, electronic claims, ICD-10, NUCC standards, Physician Quality Reporting System (PQRS) Incentive Program, Meaningful Use, and CPT 2013. Updated ICD-10 coding information prepares you for the October 2014 ICD-10 implementation date. Updated content on claim forms includes block-by-block explanations and examples for the new CMS-1500 Claim Form. Updated guidelines for the filing and submission of electronic claims include sample screenshots and prepare you for the future of the medical office.

Gain real-world practice in insurance billing and coding! Corresponding to the chapters in Fordney's Medical Insurance, 15th Edition, this workbook provides realistic, hands-on exercises that help you apply concepts and develop critical thinking skills. Study tools include chapter overviews, key terms, chapter review exercises, and case study assignments. Additionally, this workbook helps you develop a better understanding of the differences among the insurance programs when completing and electronically transmitting the 837 P or the CMS-1500 paper claim. Key terms and abbreviations lists at the beginning of each chapter provide a quick reference to the health insurance terminology you need to know. Performance objectives make learning easy by highlighting what you need to accomplish in each chapter. Study outlines focus review by listing key points for each chapter. Self-study exercises – including matching, true/false, multiple-choice, mix and match, and fill-in-the-blank questions – help you practice important concepts. Critical Thinking Assignments in the form of short, real-world vignettes prepare you for working in a real medical office and allow you to apply theory learned from the textbook. NEW! Expanded coverage of inpatient insurance billing, including ICD-10 coding and CMS provides you with the foundation and skills needed to work in the physician office, outpatient, and inpatient setting. NEW! Ambulatory Surgical Center (ASC) billing chapter provides you with the foundation and skills needed to work in this outpatient setting. NEW! Updated information on general compliance issues, HIPAA, Affordable Care Act and coding reflects changes to the main text.

Stay up on the latest in insurance billing and coding with Marilyn Fordney s Insurance Handbook for the Medical Office, 14th Edition. Trusted for more than 30 years, this market-leading handbook equips you to succeed as medical insurance specialist in any of today s outpatient settings. Coverage emphasizes the role of the medical insurance specialist in areas such as diagnostic coding, procedural coding, Medicare, HIPAA, and bill collection strategies. As with previous editions, all the plans that are most commonly encountered in clinics and physicians offices are incorporated into the text, as well as icons for different types of payers, lists of key abbreviations, and numerous practice exercises that assist you in accurately filling out claim forms. This new edition also features expanded coverage of ICD-10, electronic medical records, electronic claims submission, and the HIPAA 5010 keeping you one step ahead of the latest practices and protocols of the profession. Key terms are defined and emphasized throughout the text to reinforce understanding of new concepts and terminology. Separate chapter on HIPAA Compliance in Insurance Billing, as well as Compliance Alerts throughout the text highlights important HIPAA compliance issues to ensure readers are compliant with the latest regulations. Emphasis on the business of running a medical office and the importance of the medical insurance specialist details the importance of the medical insurance specialist in the business of the medical office. Increased focus on electronic filing/claims submission prepares readers for the industry-wide transition to electronic claims submission. Separate chapter on documentation in the medical office covers the principles of medical documentation and the rationales for it. "Service to Patient" features in most chapters offer examples of good customer service. User resources on the Evolve companion website feature performance checklists, self-assessment quizzes, the Student Software Challenge (with cases on different payer types and an interactive CMS-1500 (02-12) form to fill in). NEW! Expanded coverage of

ICD-10 prepares users to code ICD-10 with the planned effective date of October 2015. NEW! Added information on the electronic medical record and electronic claims submission including information on the HIPAA 5010 equips users for the transition between paper and electronic methods of medical records and links the CMS-1500 (02-12) form to the electronic submissions process. NEW! SimChart for the Medical Office (SCMO) application activities on the companion Evolve website adds additional functionality to the insurance module on the SCMO roadmap."

Expanded A&P key terminology sections give readers ample terminology reinforcement, including proper pronunciations.

This complete self-study course on coding combines content, practice, and self-assessment into one online learning tool that the learner can follow at his or her own pace. The online program assumes the role of instructor, guiding individuals through the material and directing them when to read relevant sections from the text, checking their comprehension along the way, and providing feedback and encouragement. Users follow the program and learn at their own pace, working through chapter "lesson lectures" and reading assigned sections of the text as they progress. Interactive exercises, questions, and activities allow users to check their comprehension and learn from immediate feedback. Illustrations clarify concepts and familiarize students with the clinical procedures they are learning to code. Chapter exams are scored and incorporated in a grade book, which users can view to evaluate their progress. A series of approximately 18 SlideShows with audio narration explain and demonstrate clinical procedures. Hypertext links incorporated into the lesson lectures open pop-up boxes with further explanations and/or definitions of concepts and terms. Links to relevant web sites provide additional resources to enhance learning or stimulate discussion within a cohort group. An extensive glossary of approximately 650 terms provides correct definition for key terms throughout the course. All content has been updated to current industry standards; for use with Step-by-Step Medical Coding, 5th Edition ensuring that students learn from the most up-to-date material available. Each online chapter includes engaging "lesson lectures" by the author, guiding the learner through the online and text content. Interspersed self-comprehension questions, learning activities, and lesson quizzes throughout the online content allow learners to check their comprehension and learn from feedback. End-of-chapter review and self-assessment exercises include a specially created case-based coding activity, as well as matching, fill-in-the-blank, and multiple choice. Answers to the textbook exercises allow students to check their work on the exercises printed in the text against the answers posted within the course.
