'Acute and Critical Care Echocardiography' is the first practical guide dedicated to helping doctors use transthoracic echocardiography to manage acutely and critically ill patients. The text provides readers with a grounding in theoretical evidence-based aspects of critical care echocardiography. The work is mapped to the new accreditation syllabus in Advanced Critical Care Echocardiography set by the British Society of Echocardiography, ensuring that it is relevant to professional standards and teaches doctors exactly what they need to know. Self-assessment questions help readers retain what they have learned and revise for exams

Providing a clear explanation of the relevant medical science behind the individual medical specialties, Basic Science for Core Medical Training and the MRCP, is an indispensable part of a candidate's MRCP preparation. Directly linked to the Royal College exam, the book follows the same systems-based approach as the syllabus for accurate and effective revision. With full coverage of basic science for the medical specialties, the book features material on genetics, cellular, molecular and membrane biology, and biochemistry. Content is presented in an illustrated and easy-to-read format, ensuring that the basic science for each medical speciality is more approachable and accessible. A focus on how the basic sciences aid understanding of clinical practice is reinforced through key tables of differential diagnoses and pharmacology. Ten multiple choice questions at the end of each chapter consolidate learning and enable candidates to test their knowledge. The book also covers common examination errors and areas of misunderstanding to aid learning and help candidates avoid common pitfalls.

Accompanying CD-ROM contains a 265-question examination with rationales and test-taking tips for additional review.

THIS BOOK IS A COMPREHENSIVE VERSION OF HERBAL DRUG TECHNOLOGY, INDUSTRIAL PHARMACY-I, II IN QUESTION AND ANSWER FORMAT. IT'S AN EXCELLENT INFORMATION FOR PHARMACEUTICS COMPETITIVE EXAMINATION. So you think you've got a handle on therapeutic management? How drugs work and interact with each other, how the body handles them and how drug treatments are assessed? This self-assessment volume allows you to learn, revise and test yourself on all aspects of clinical pharmacology and therapeutics. Four different question types are provided to test your knowledge in this important area - multiple choice questions, extended matching questions, 'best of lives' and problem-solving questions. Detailed explanatory answers ensure this book solves your queries as well as providing essential revision for those all-important exams. Test your knowledge with Clinical Pharmacology and Therapeutics: Questions for Self Assessment and not only develop your exam technique but become a better prescriber.

The perioperative care of individuals with neurologic compromise is critically important, yet it is only one dimension of the rich relationship between anaesthesiology and the neurosciences. The mechanism of everyday therapeutic interventions such as anaesthesia and analgesia is exciting neuroscience in its own right. At the new frontier of outcomes studies lies the question of how the perioperative period might impact the brain. For example, questions related to anaesthetic neurotoxicity, delirium, and cognitive dysfunction pose critical challenges for the field. The Oxford Textbook in Neuroscience and Anaesthesiology addresses the exciting field of neuroanaesthesiology in a new and stimulating way. In twenty eight chapters, the neuroscientific basis of anaesthesiology, the full spectrum of clinical neuroanaesthesia, and the care of neurologic patients undergoing non-neurologic surgery are explored in one comprehensive textbook for the first time. The first section considers the neural mechanisms of general anaesthetics, cerebral physiology, the neurobiology of pain, and more. The second section explores the care of patients with neurologic disease in the operating room or intensive care unit. These clinical chapters systematically treat the perioperative considerations of both brain and spine surgery, and provide introductions to neurocritical care and pediatric neuroanaesthesia. The final section outlines the care of neurologic patients undergoing non-neurologic surgery. It examines key connections of neurology and anaesthesiology, examining how conditions such as dementia, stroke, or epilepsy interface with the perioperative period. Each chapter has been carefully crafted to be concise yet highly informative, reflecting the cutting edge of neuroscience and neuroanaesthesiology. This international textbook gathers the best available expertise of authors and leaders worldwide. Includes access to online-only content, including more than 20 cases and more than 90 questions that can be used in presentations and teaching sessions. By activating your unique access code, you can access and use the material.

Preparing to Pass the FRCA: Strategies for Exam Success equips you with the skills of effective revision and time management to maximise your success. The book takes each element of the FRCA exam and provides tips and techniques on how to approach the different types of questions, and includes worked examples with answers, so that you can undertake your revision accordingly. It will help you to target your revision so you can cover the breadth of topics in the FRCA syllabus and ensure that you structure your revision in an efficient way, as well as helping you to approach the exam and convey your knowledge through writing or speech correctly. Taking many common problems candidates face when preparing for this exam, the book covers motivation, effective studying, managing nerves, and scheduling time to study amongst other commitments.
